Do you see yourself here ?

Always searching for a trading system that requires no work or decisions?

Meandering from one system to another without mastering any of them?

Blowing a ton of cash on increasingly desperate attempts to find a trading method that works?

There’s a much easier way...

The 3 Secrets...

1

Secret #1

Determine the trend of any trading vehicle in any market in any time frame.

2

Secret #2

Hold risk/reward constant at 1:3 using a purely mechanical, stress-free entry technique.

3

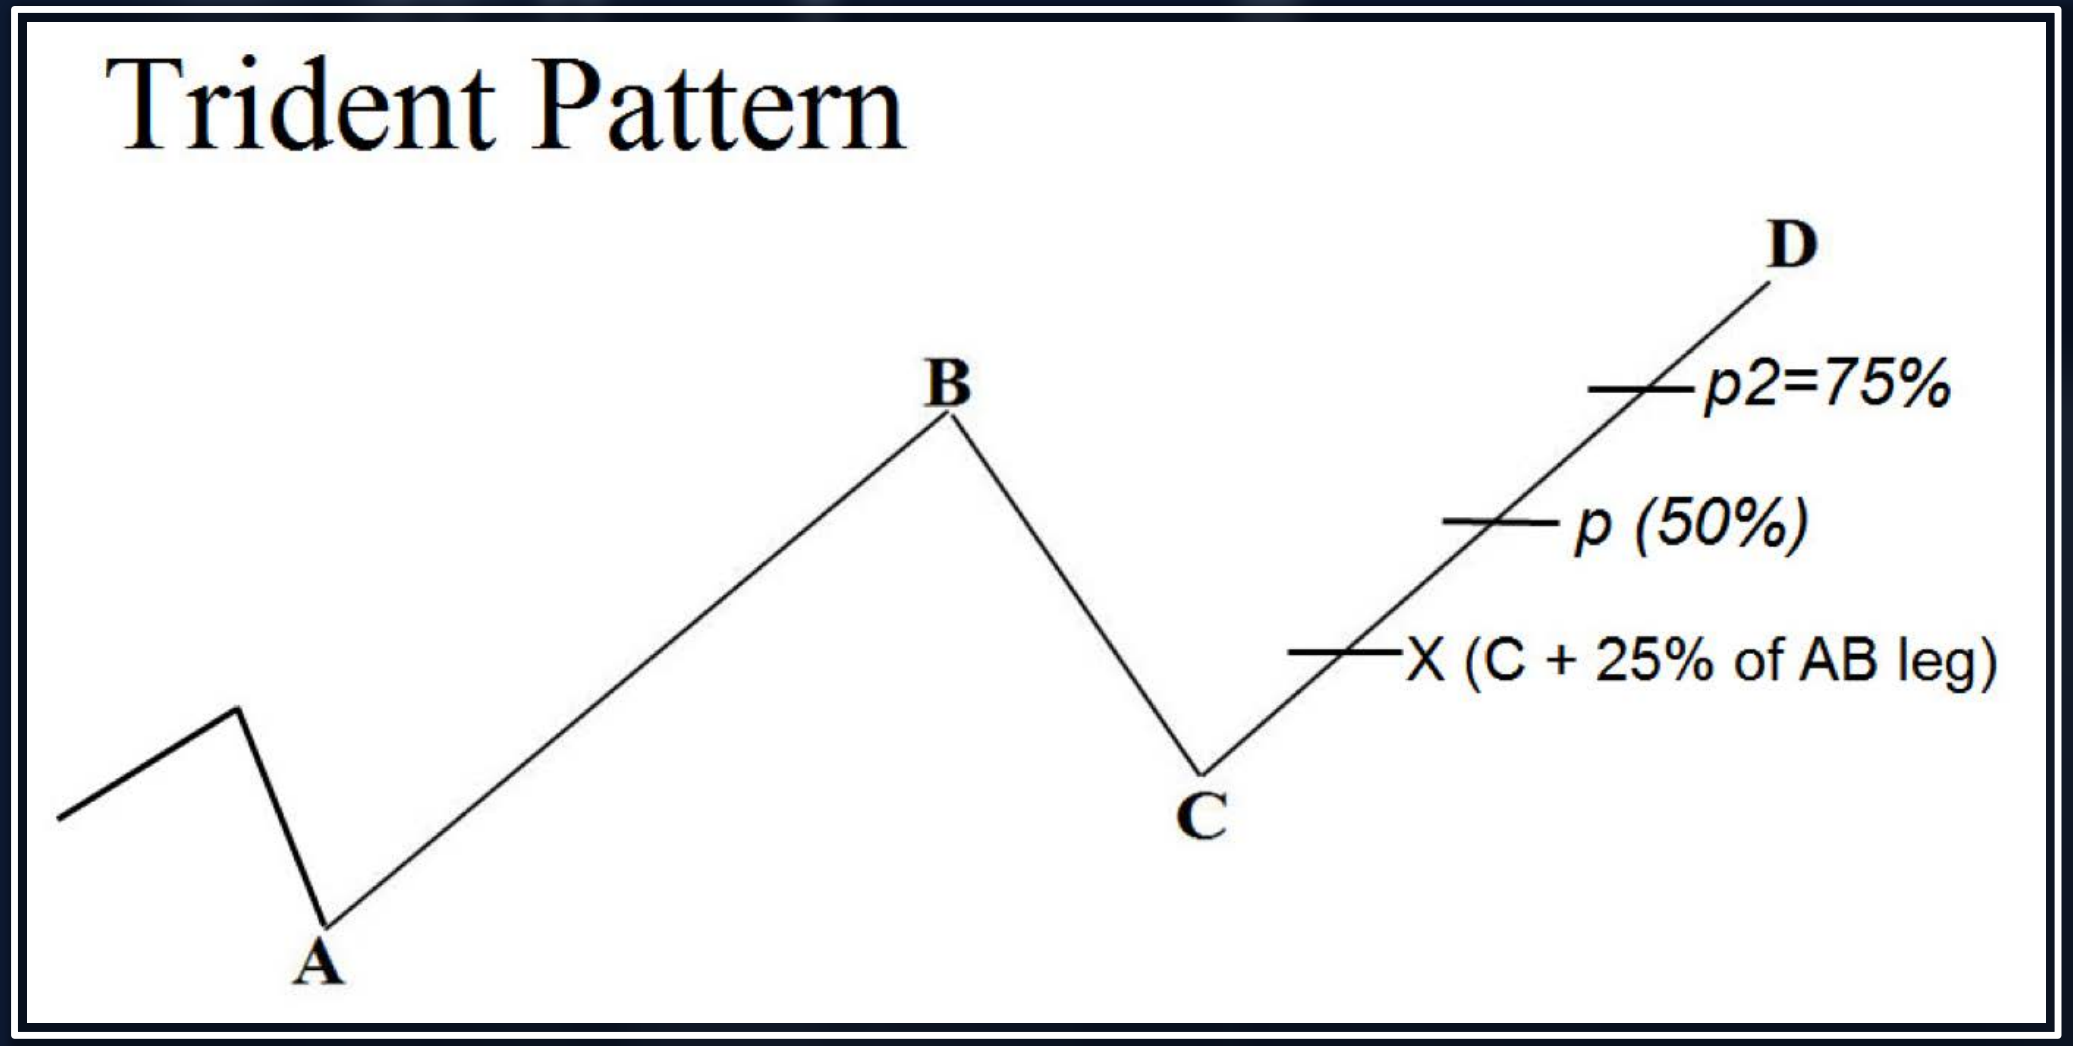

Secret #3

Avoid the single biggest mistake that makes disciplined trading impossible.

The Hidden Pivot Method

- Trade any vehicle long or short, in any time frame
- Identify trends and targets with two-decimal precision
- Control trade risk very tightly from entry to exit
- Understand the ‘psychology’ behind price action
- Sharpen your instincts by following some simple rules

The Basic Pattern

You can trade *anything* with the Hidden Pivot Method...

I used Elliott Wave to trade forex . But Rick's course was the best money I've ever spent to improve my trading. Applying his method to five-minute charts, I'm running about 47% winners.

Secret #1

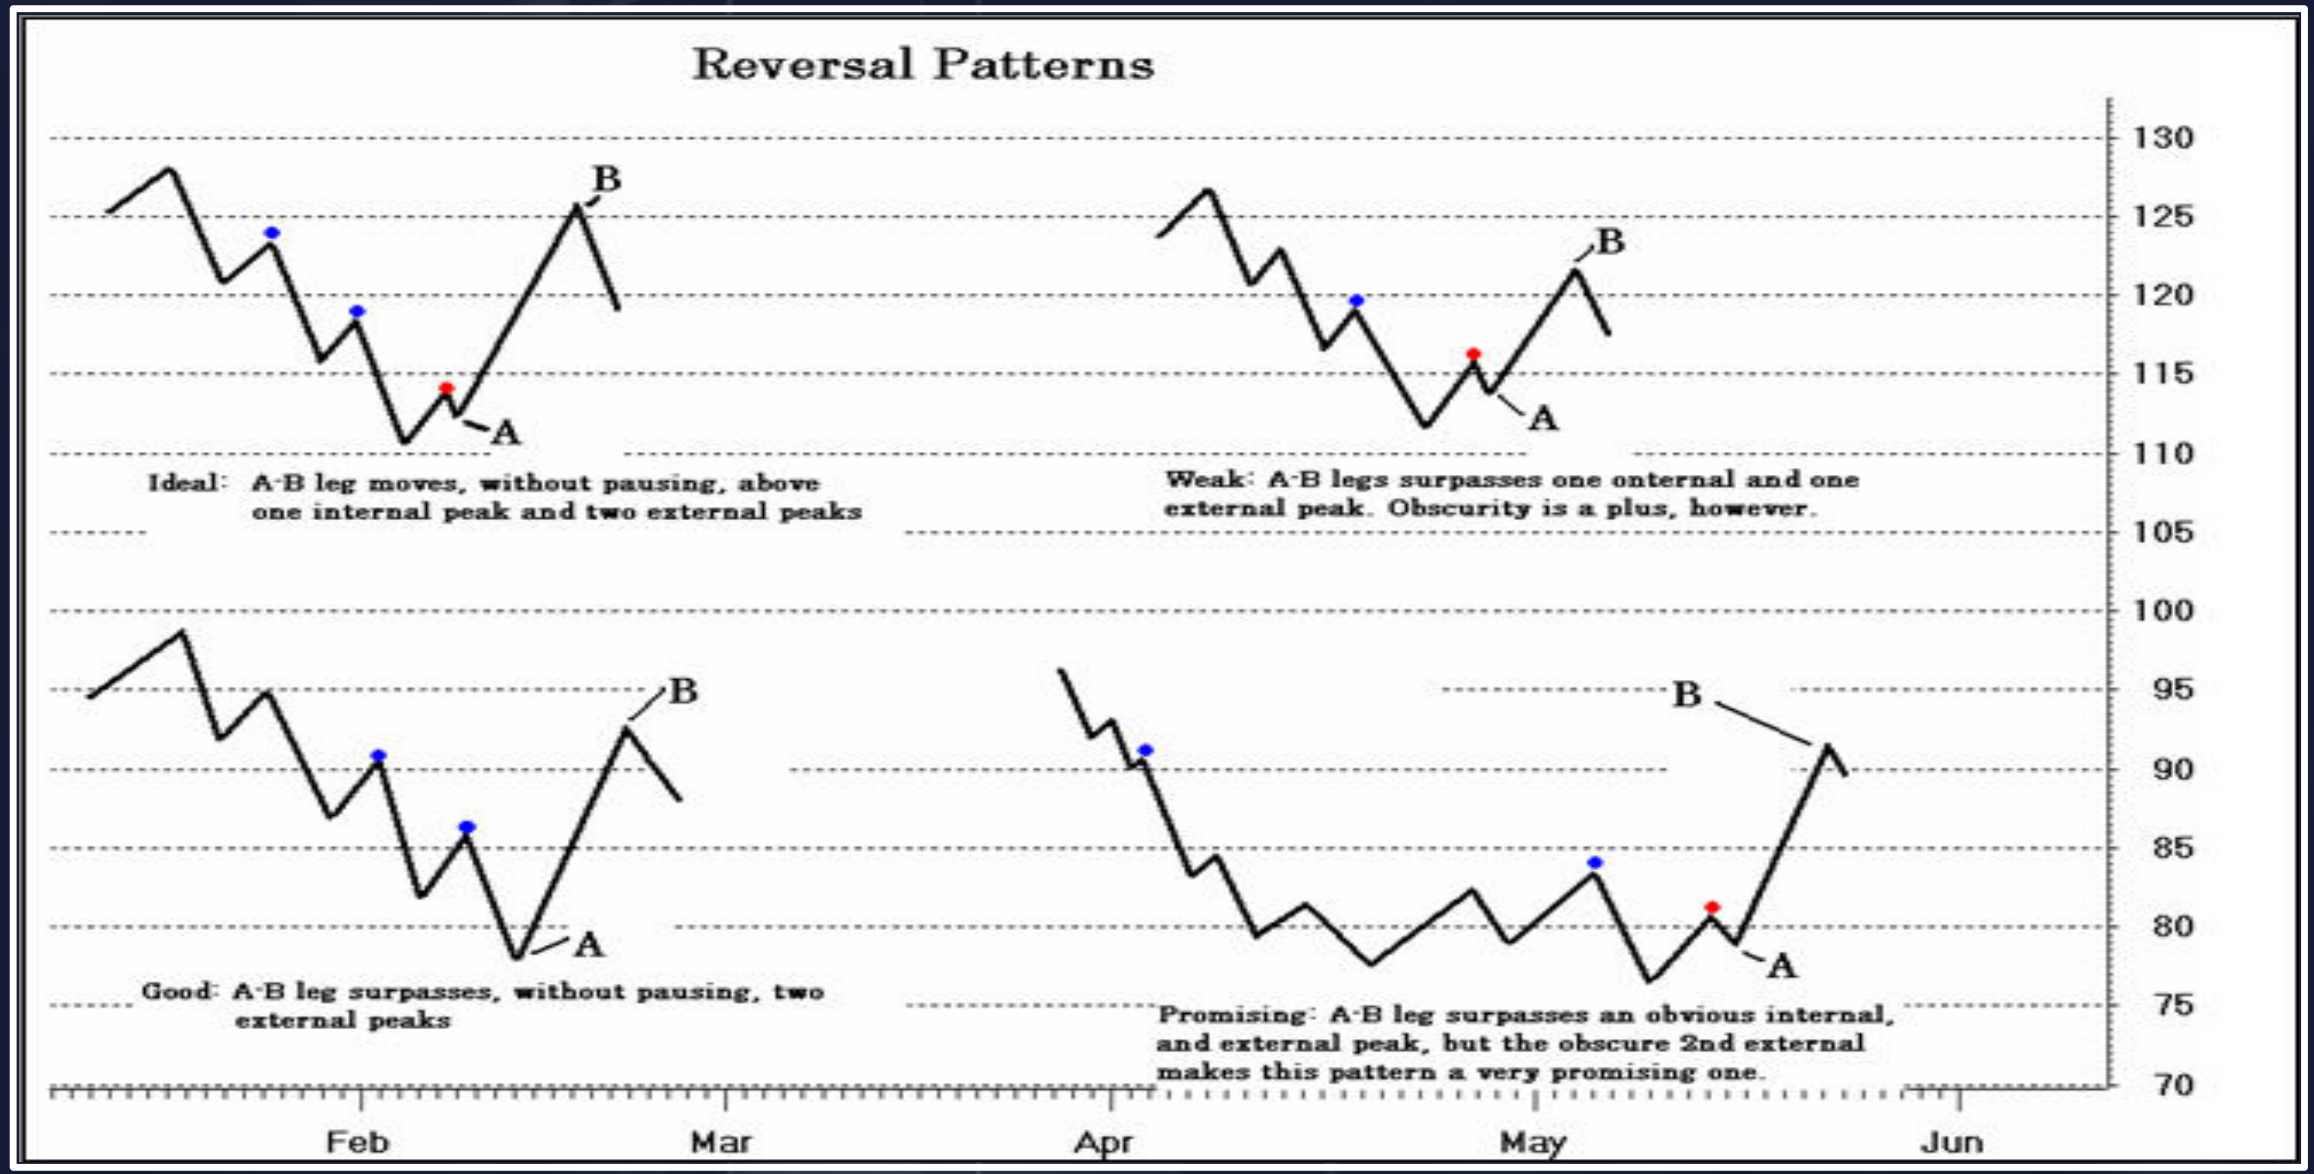

1

Determine the trend of any trading vehicle in any market, in any time frame using IMPULSE LEGS

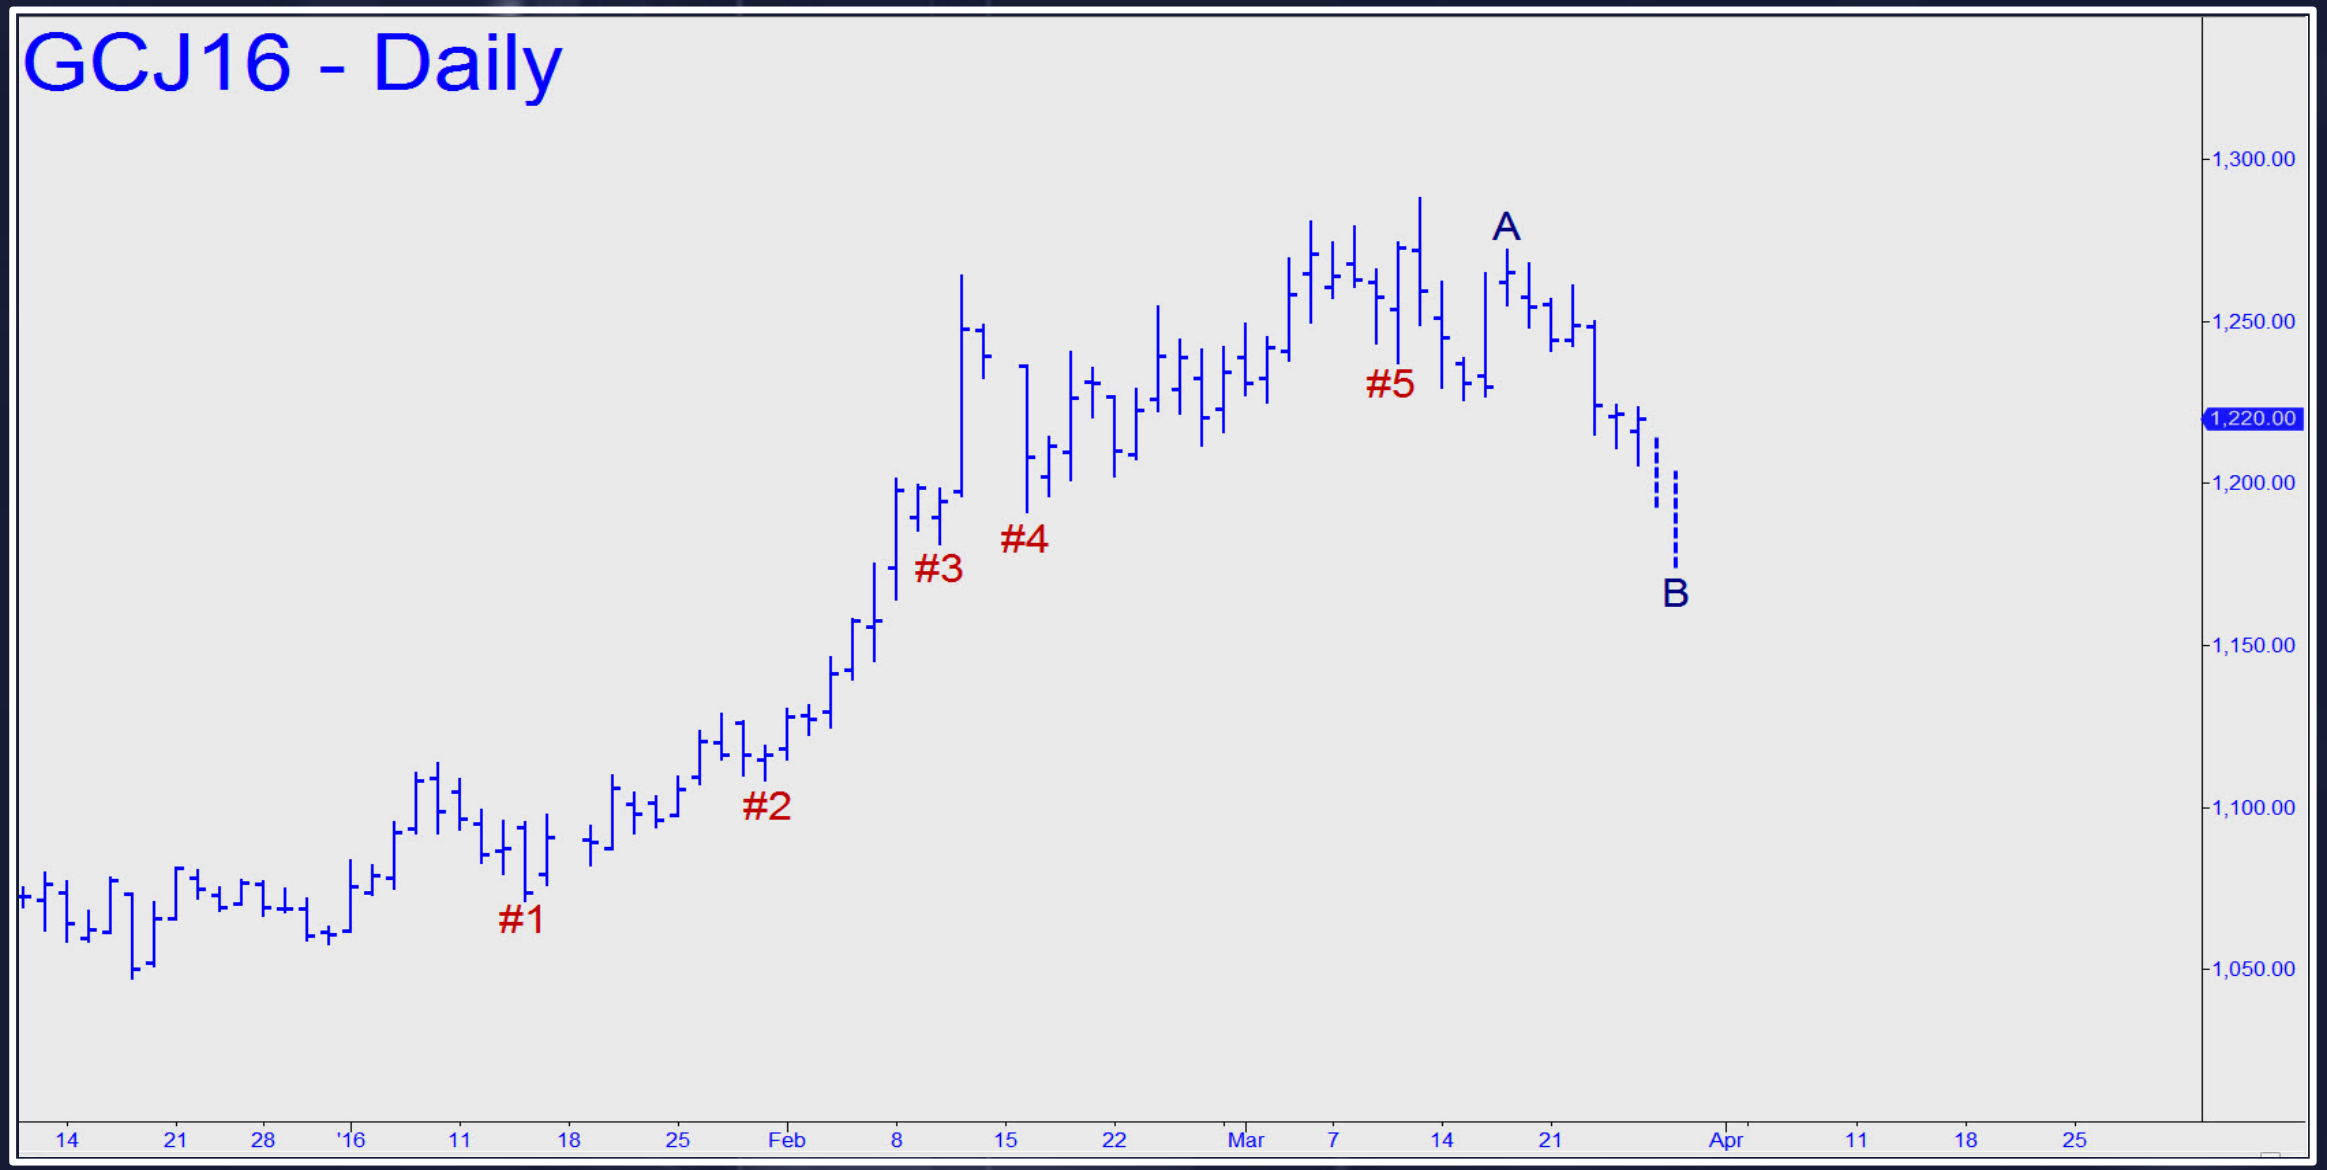

A true Impulse leg must exceed 2 prior peaks

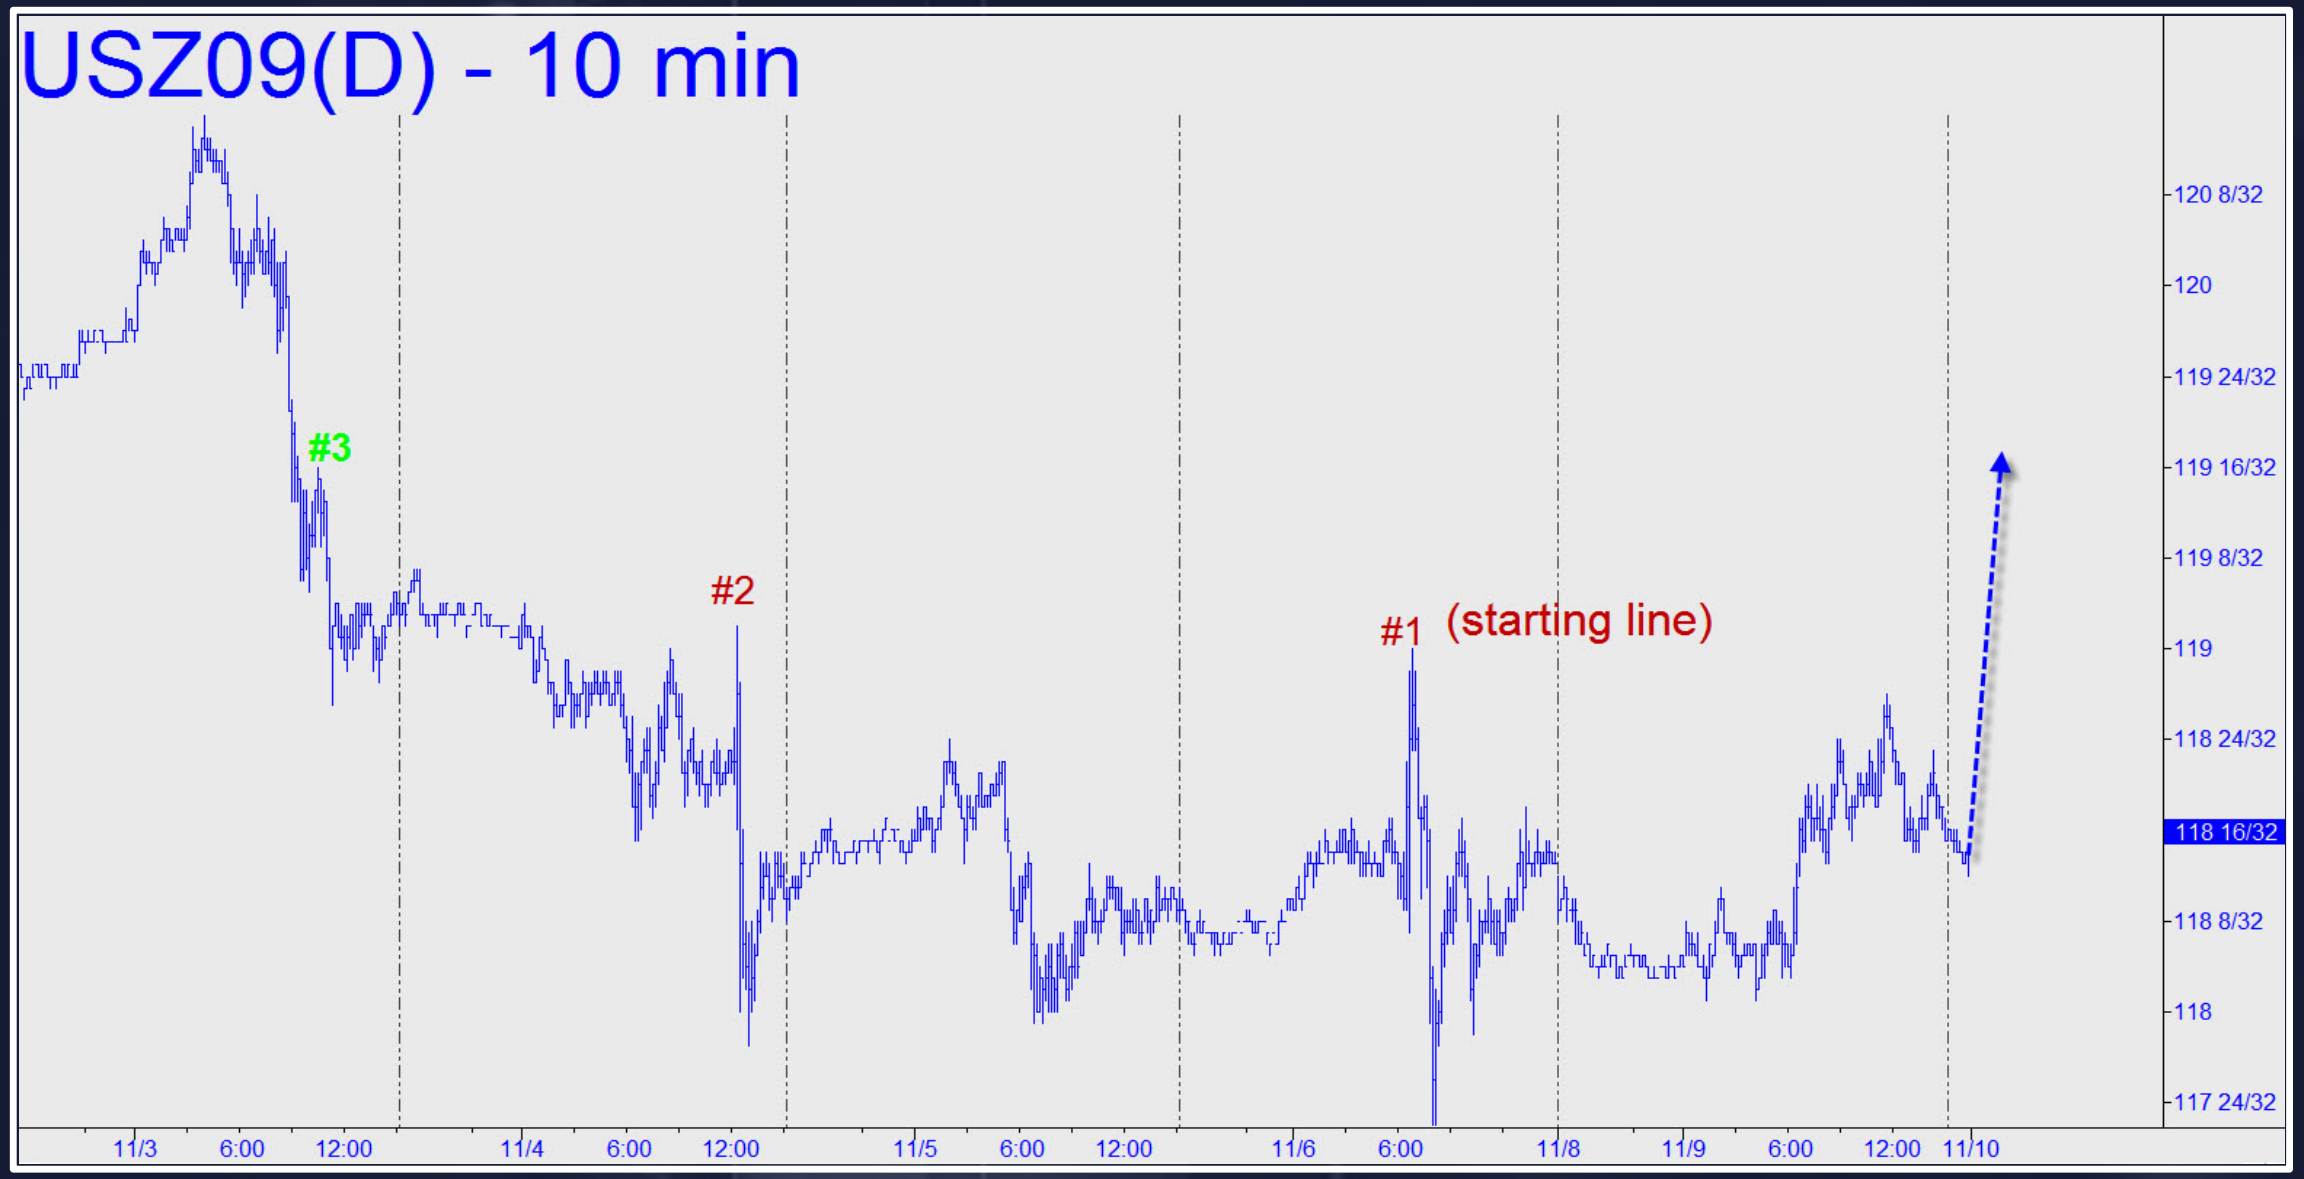

A hierarchy of impulse-leg strength

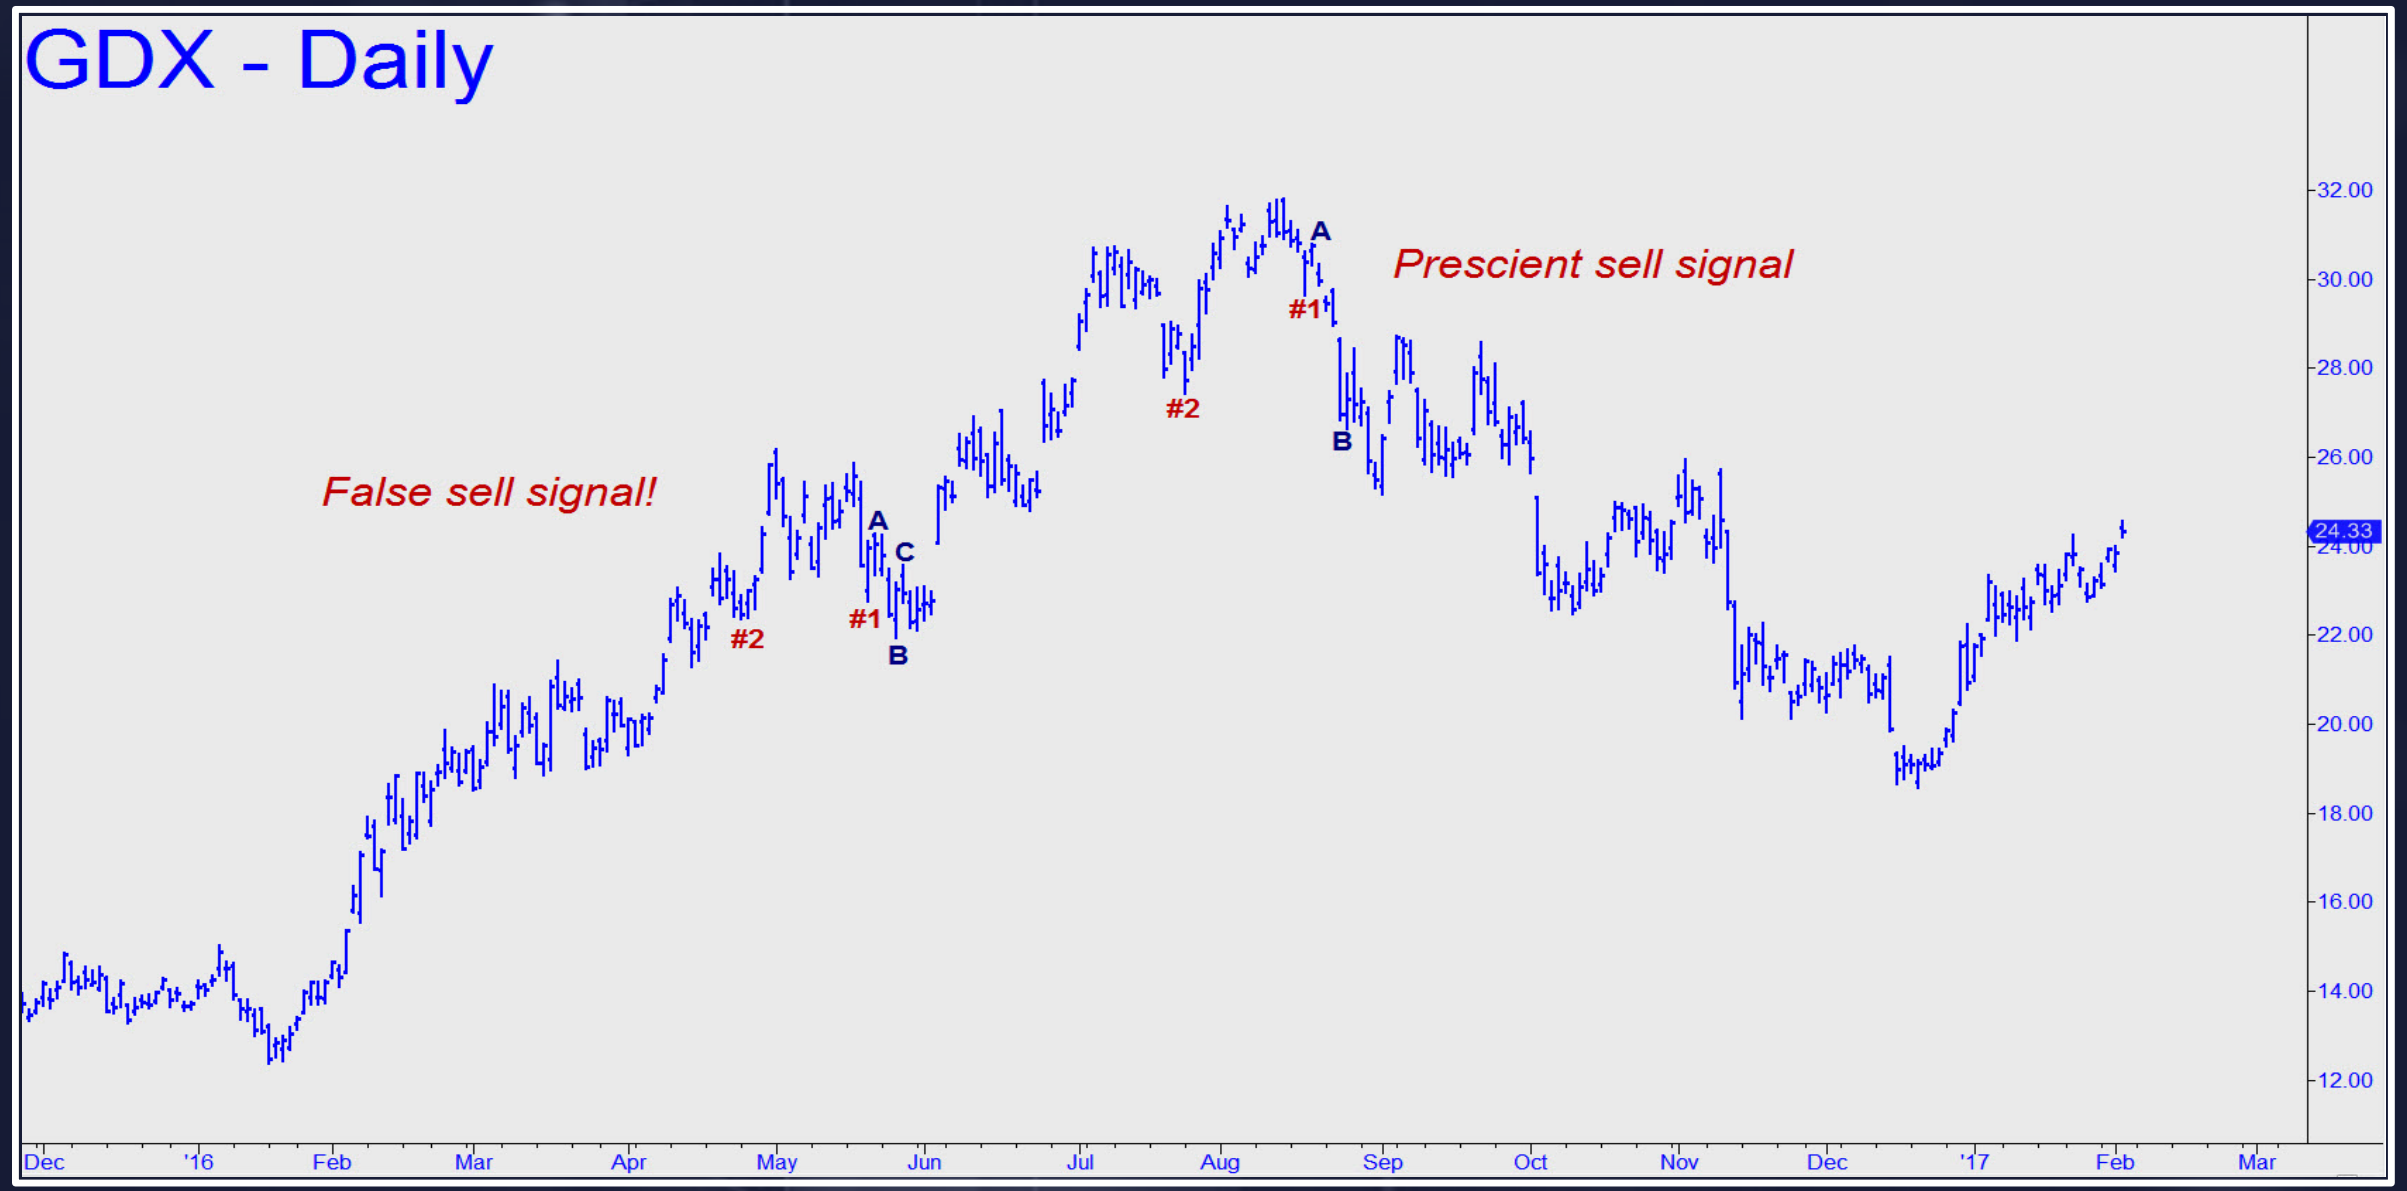

Prior lows help us qualify impulse-leg strength

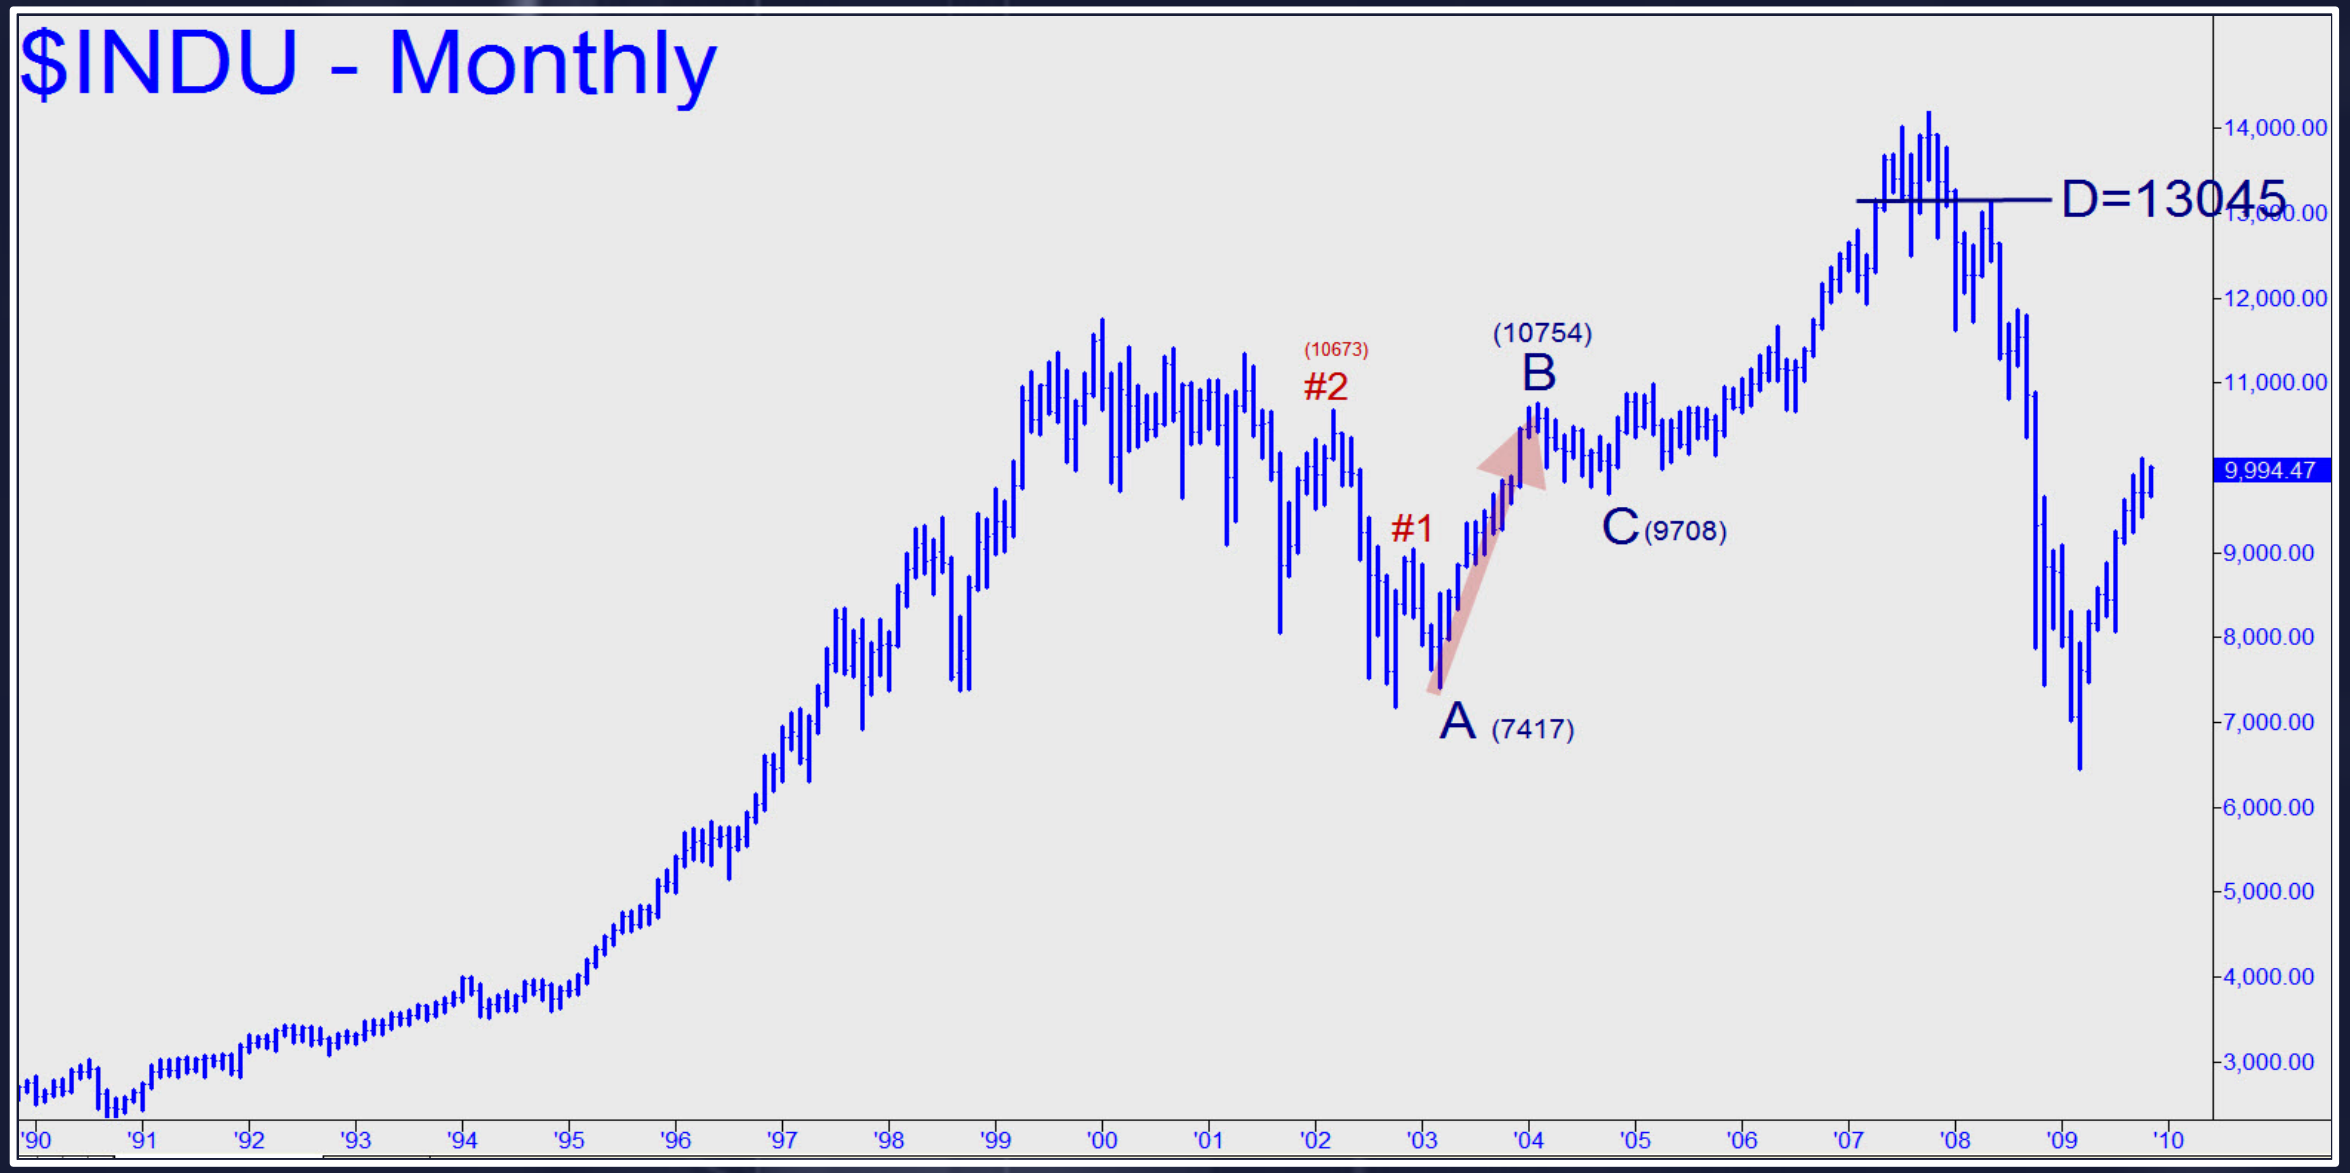

Strong impulse leg warns of major reversal

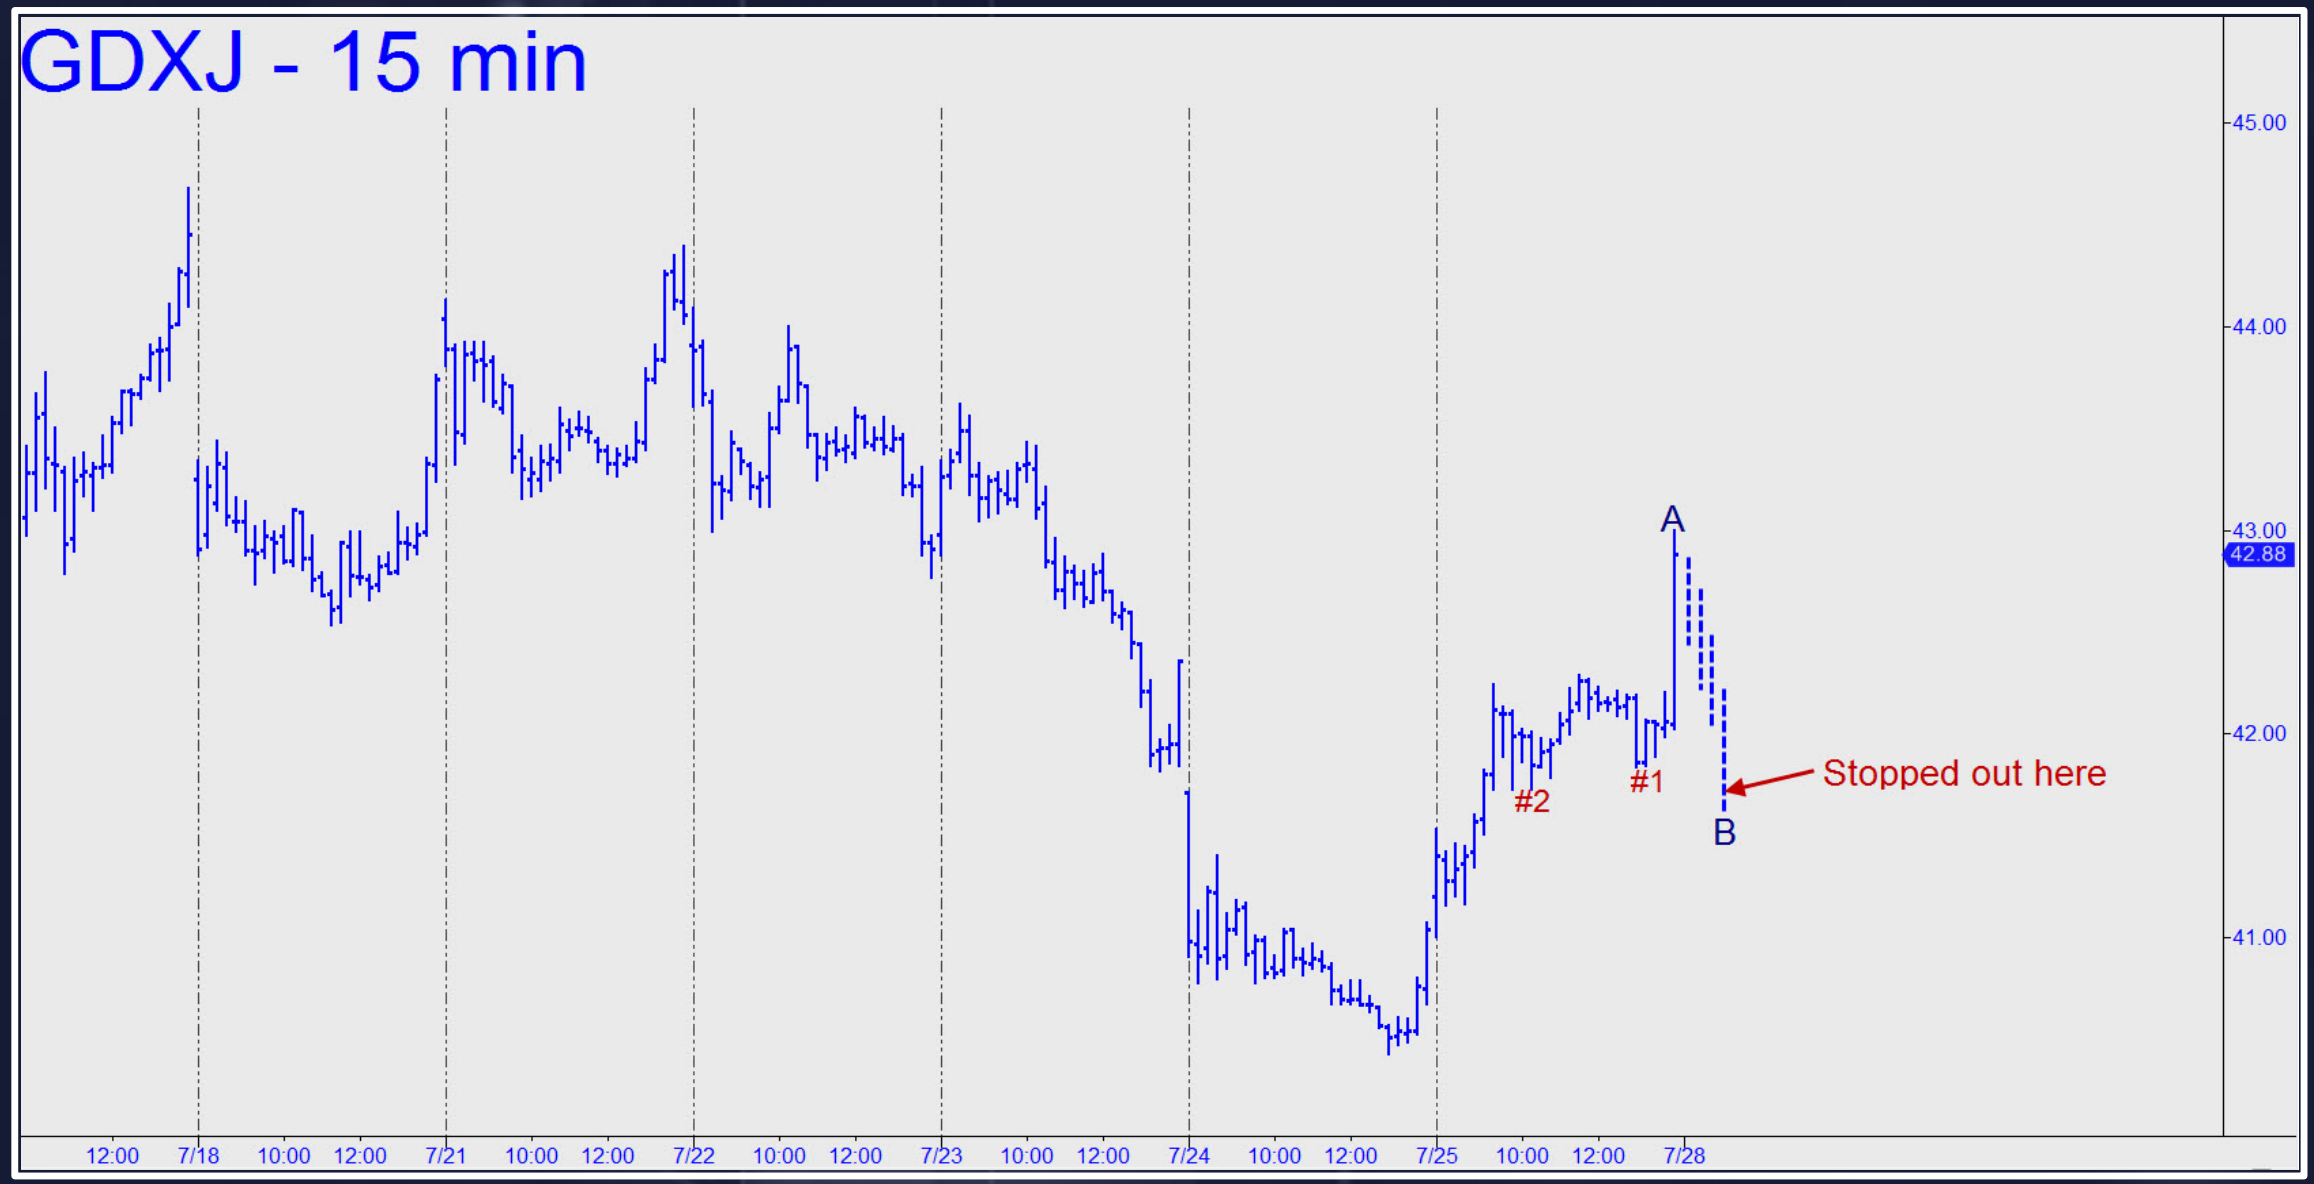

...and does it again at a very tricky time

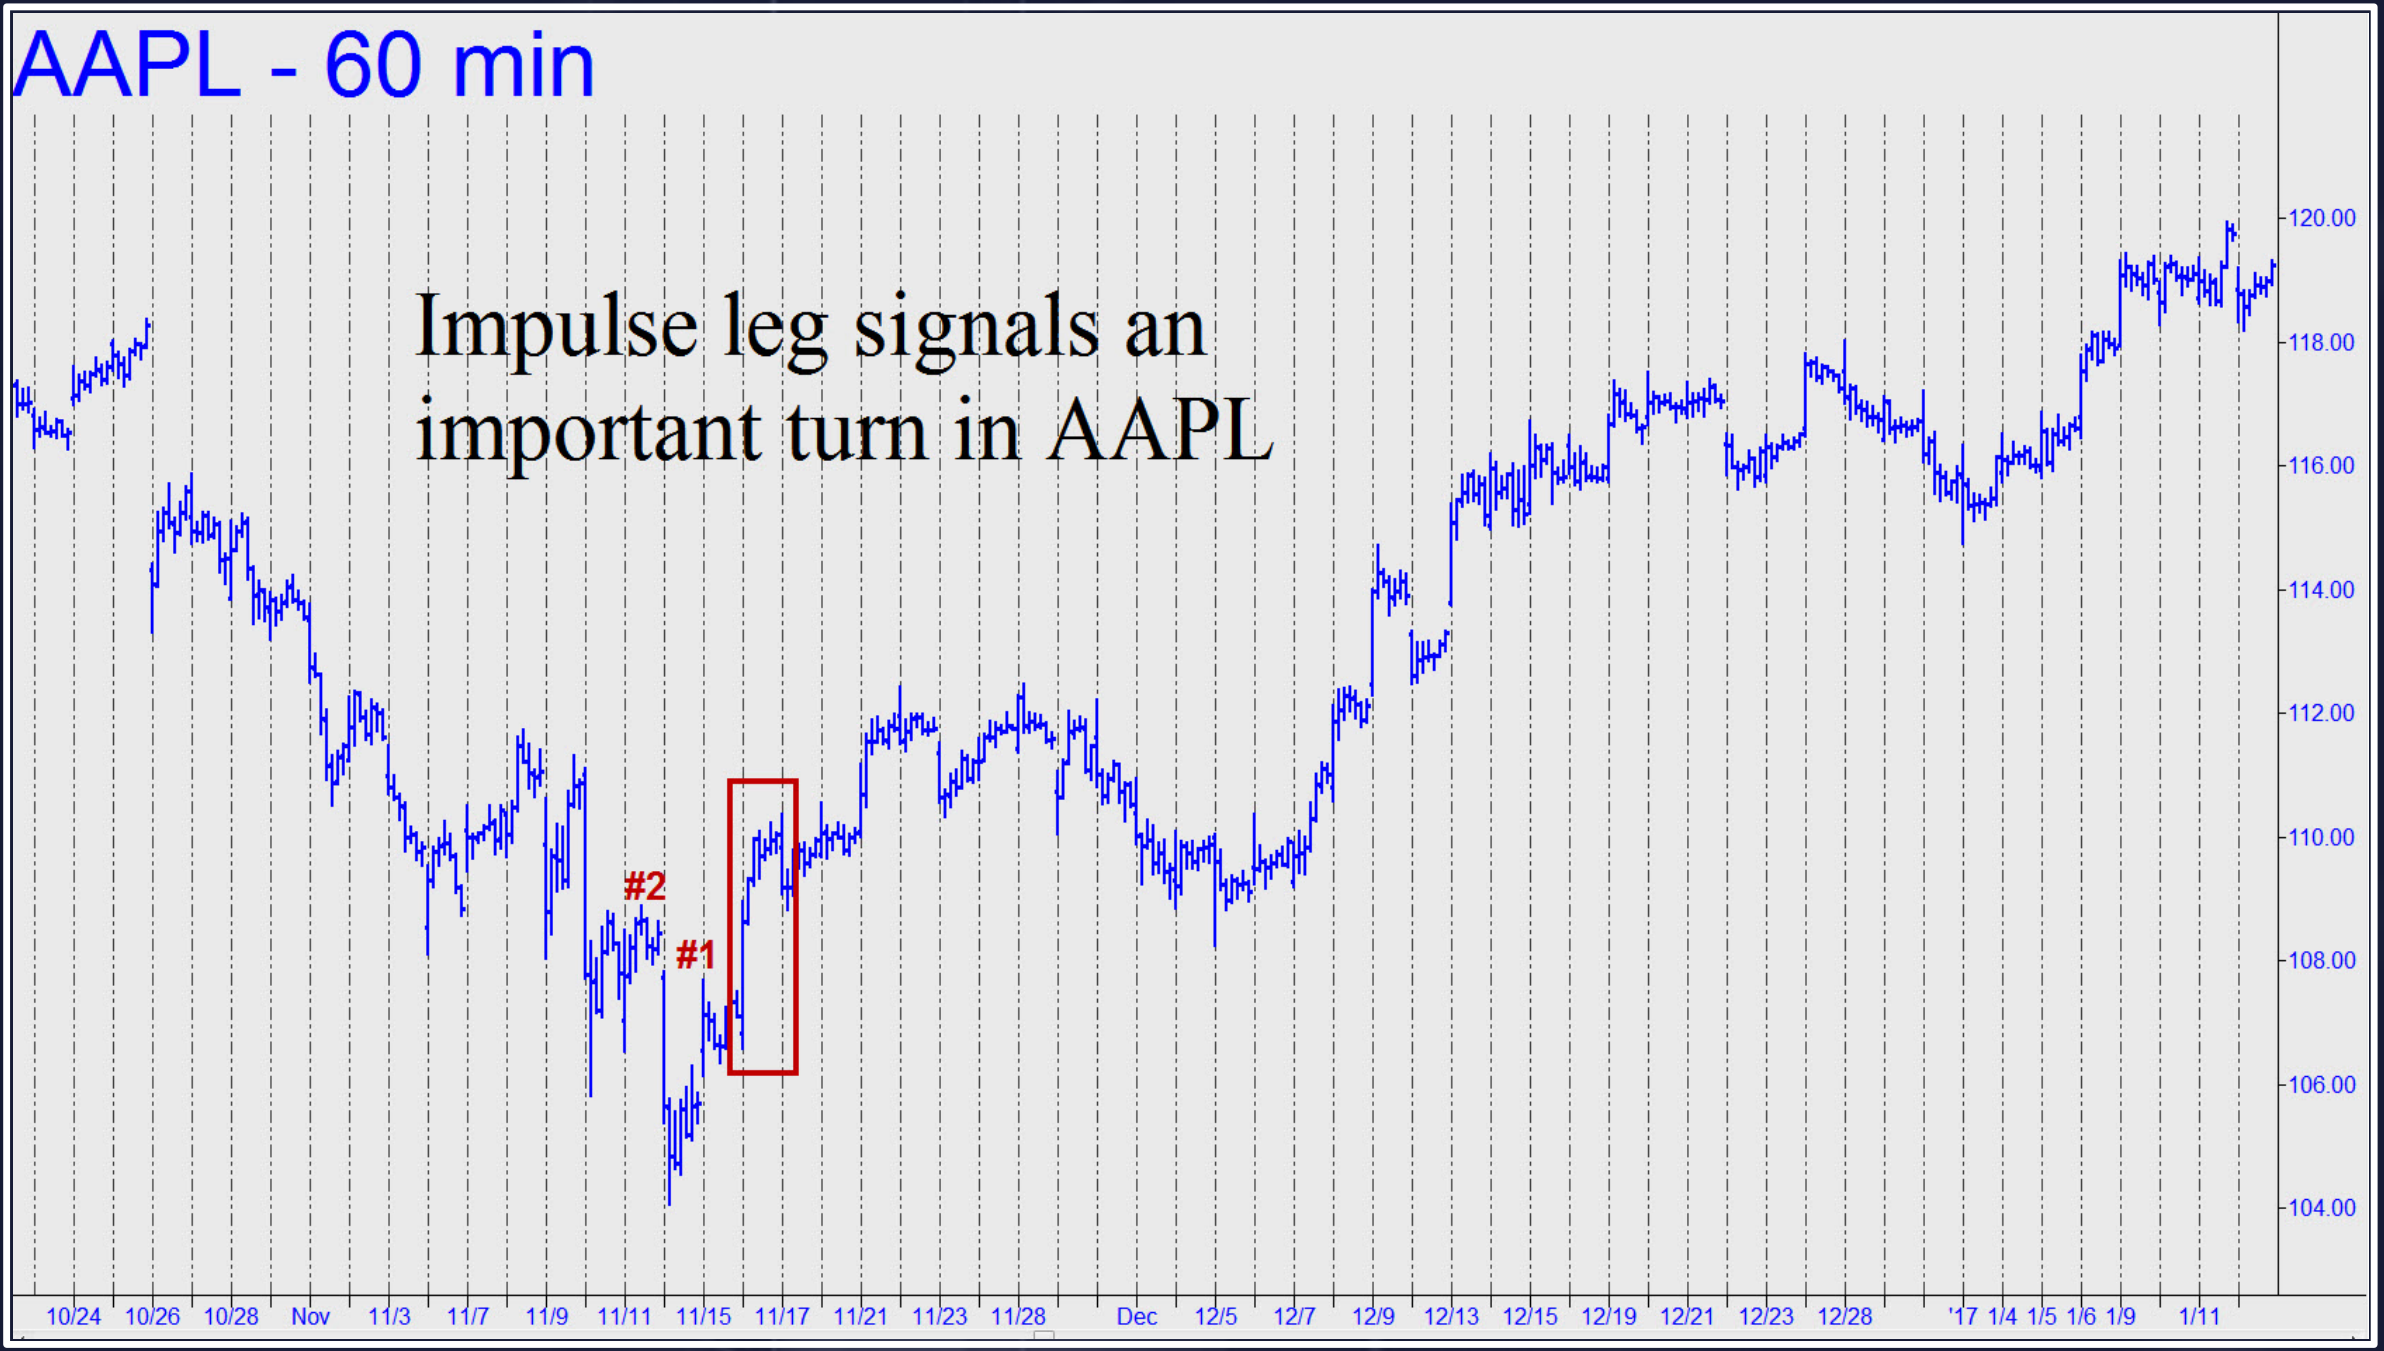

Impulse legs save us from ourselves…

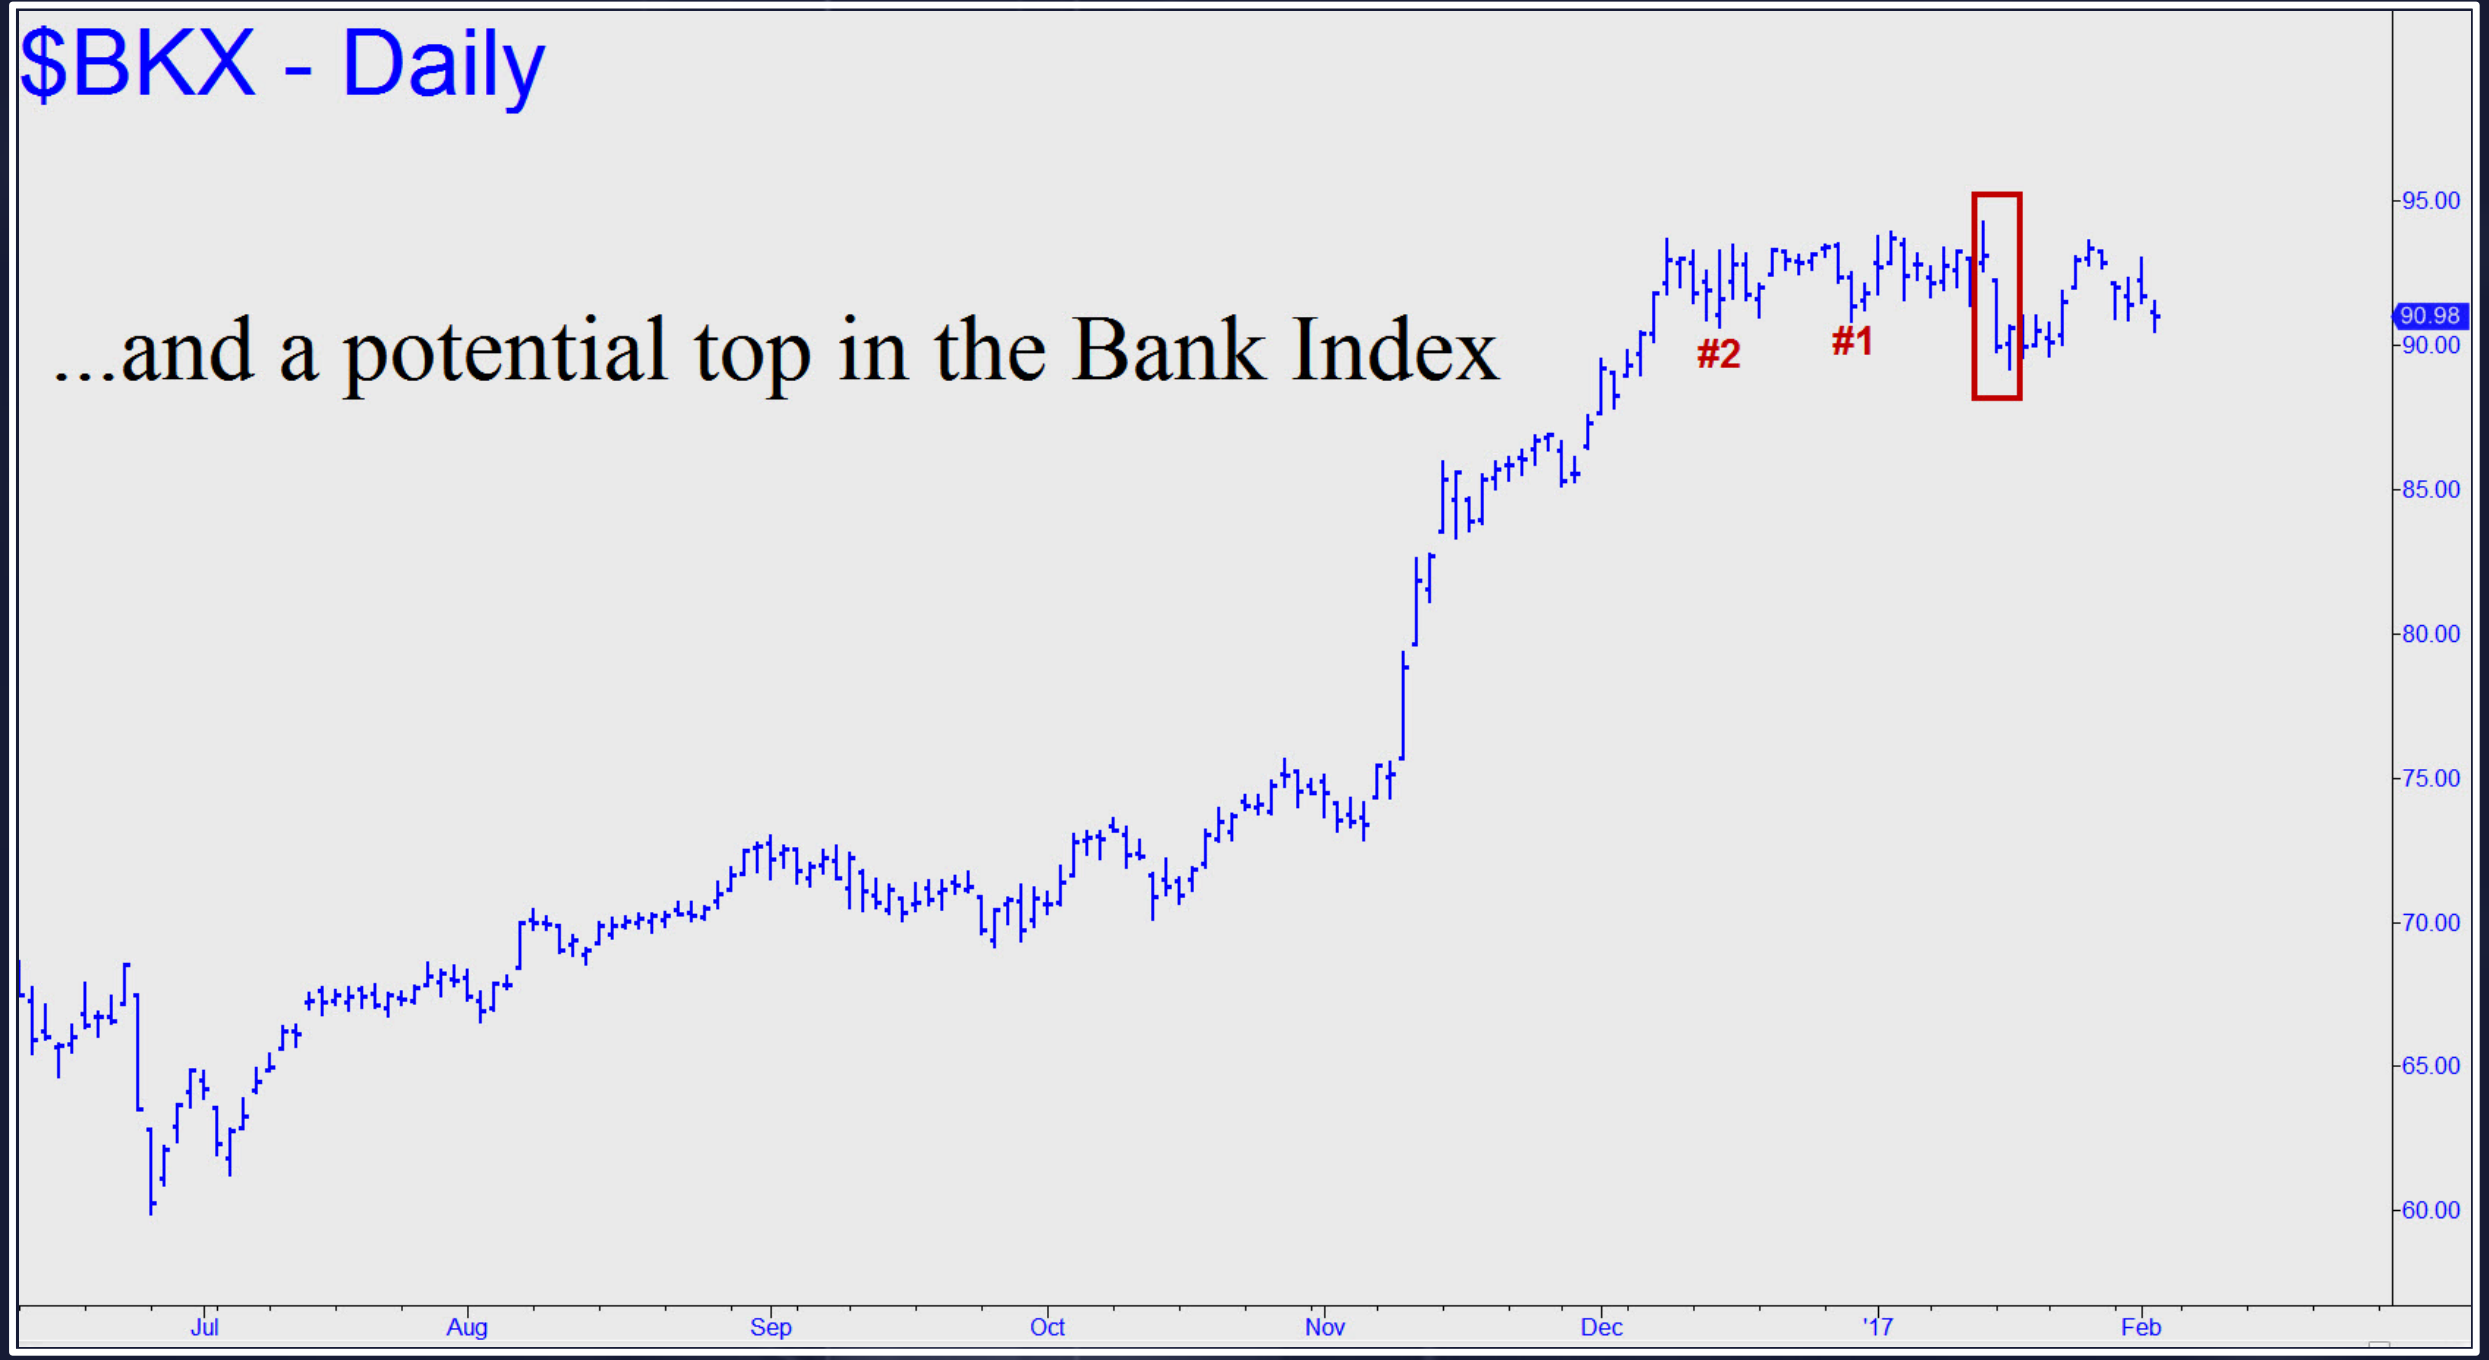

...and stop us out ahead of trouble

...and a potential top in the Bank Index

Secret #2

2

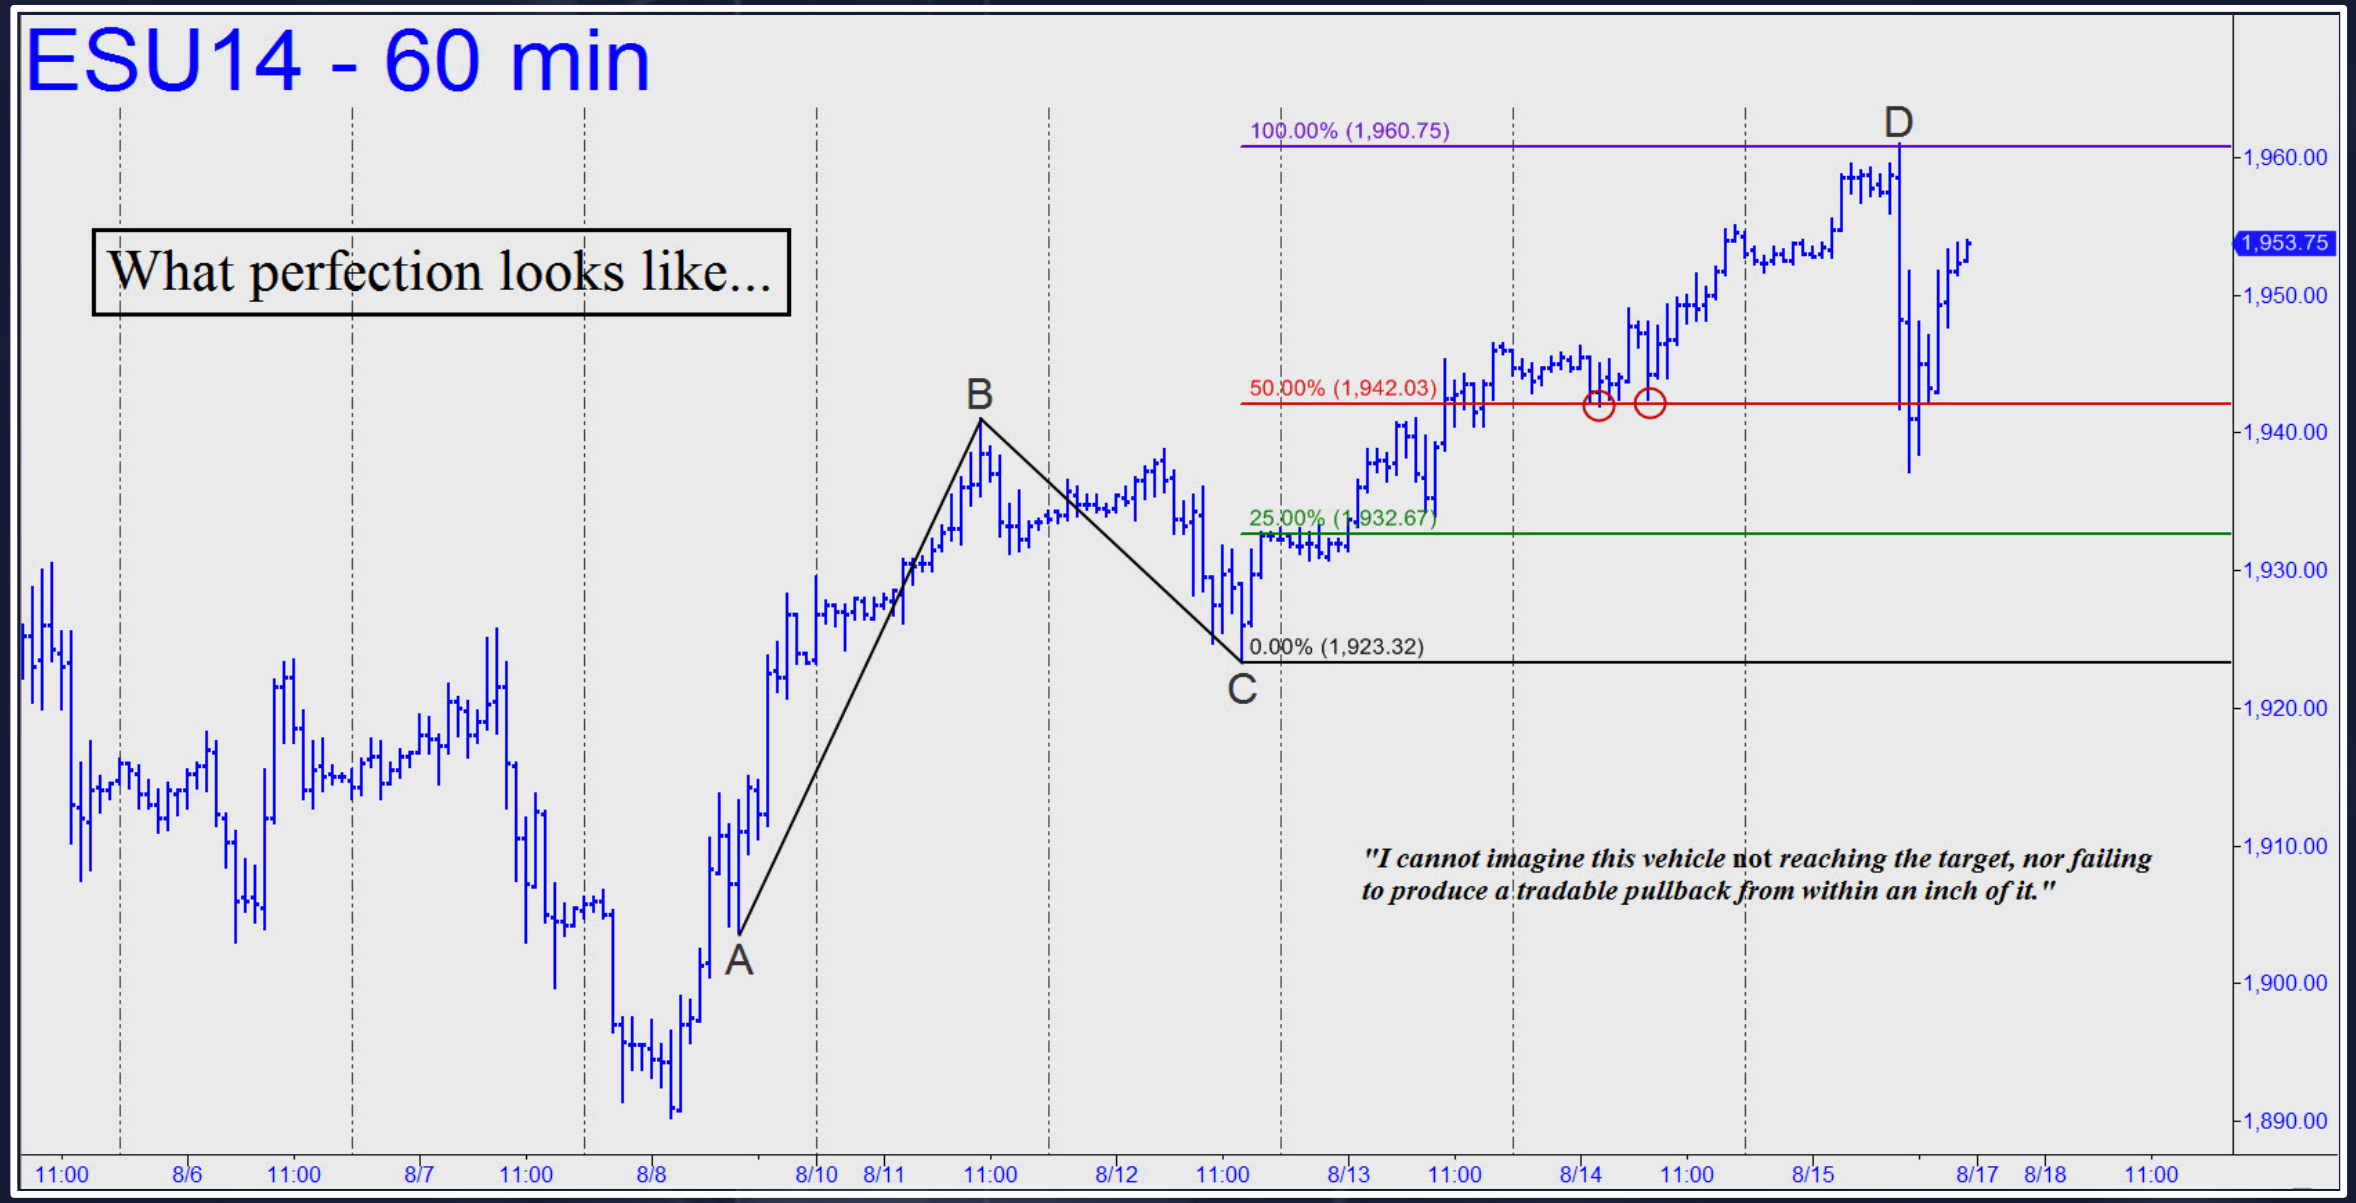

Hold risk/reward constant at 1:3 using a purely mechanical entry technique.

Mechanical trades: Nothing to decide!

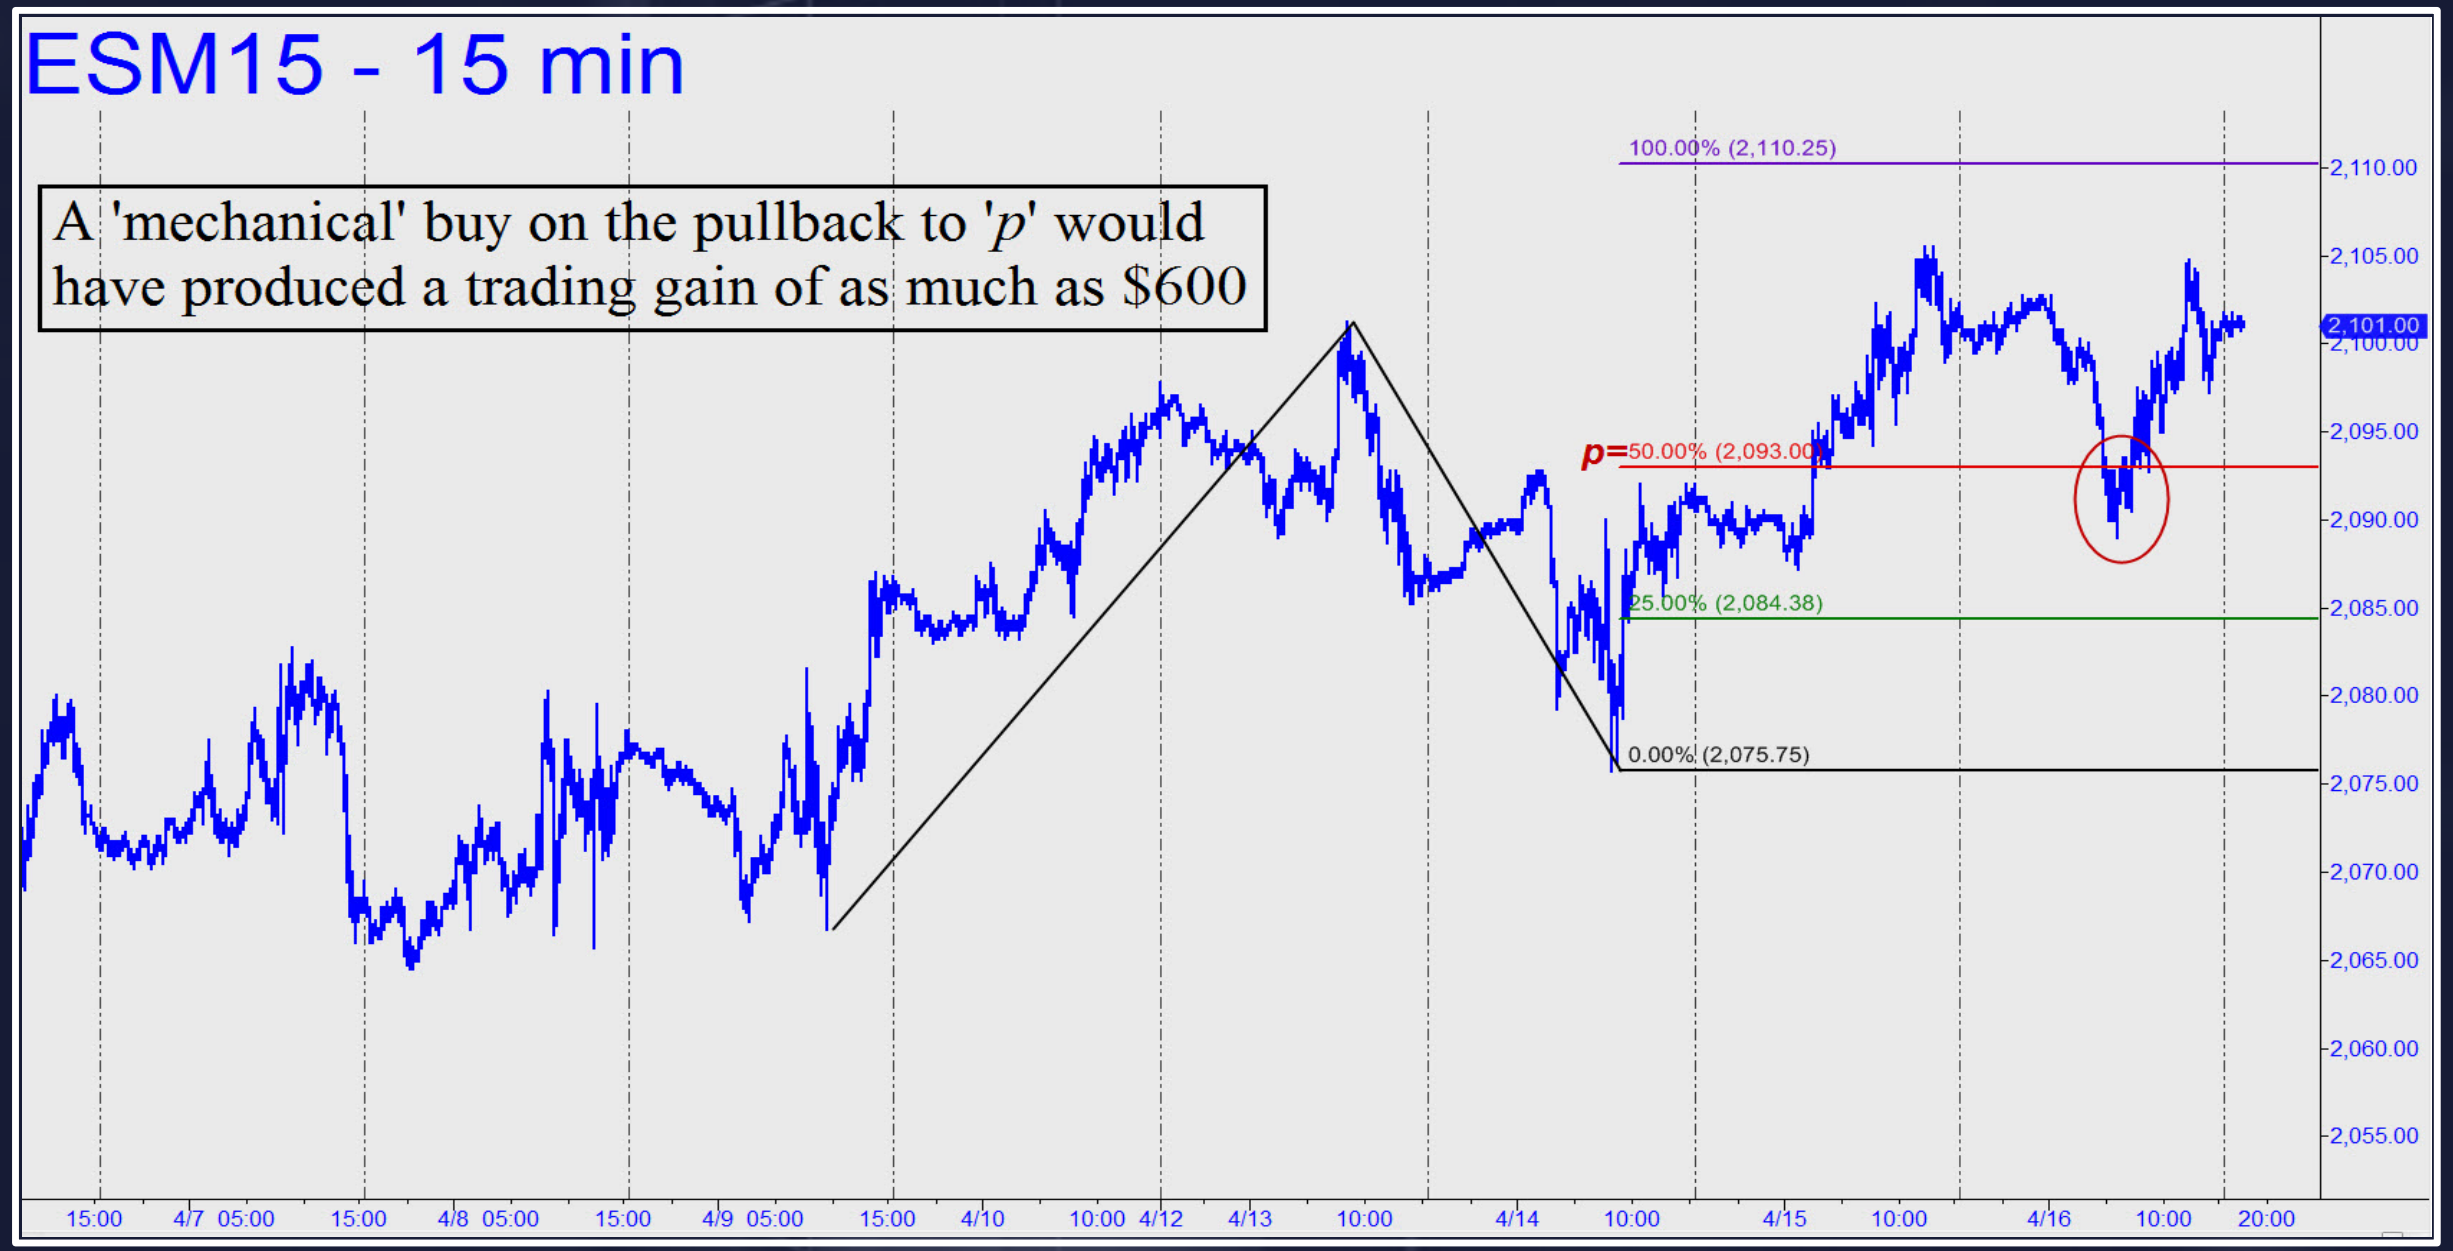

The mechanical trade is ideal when you're confident a target will be reached. Once you're aboard, just set it and forget it.

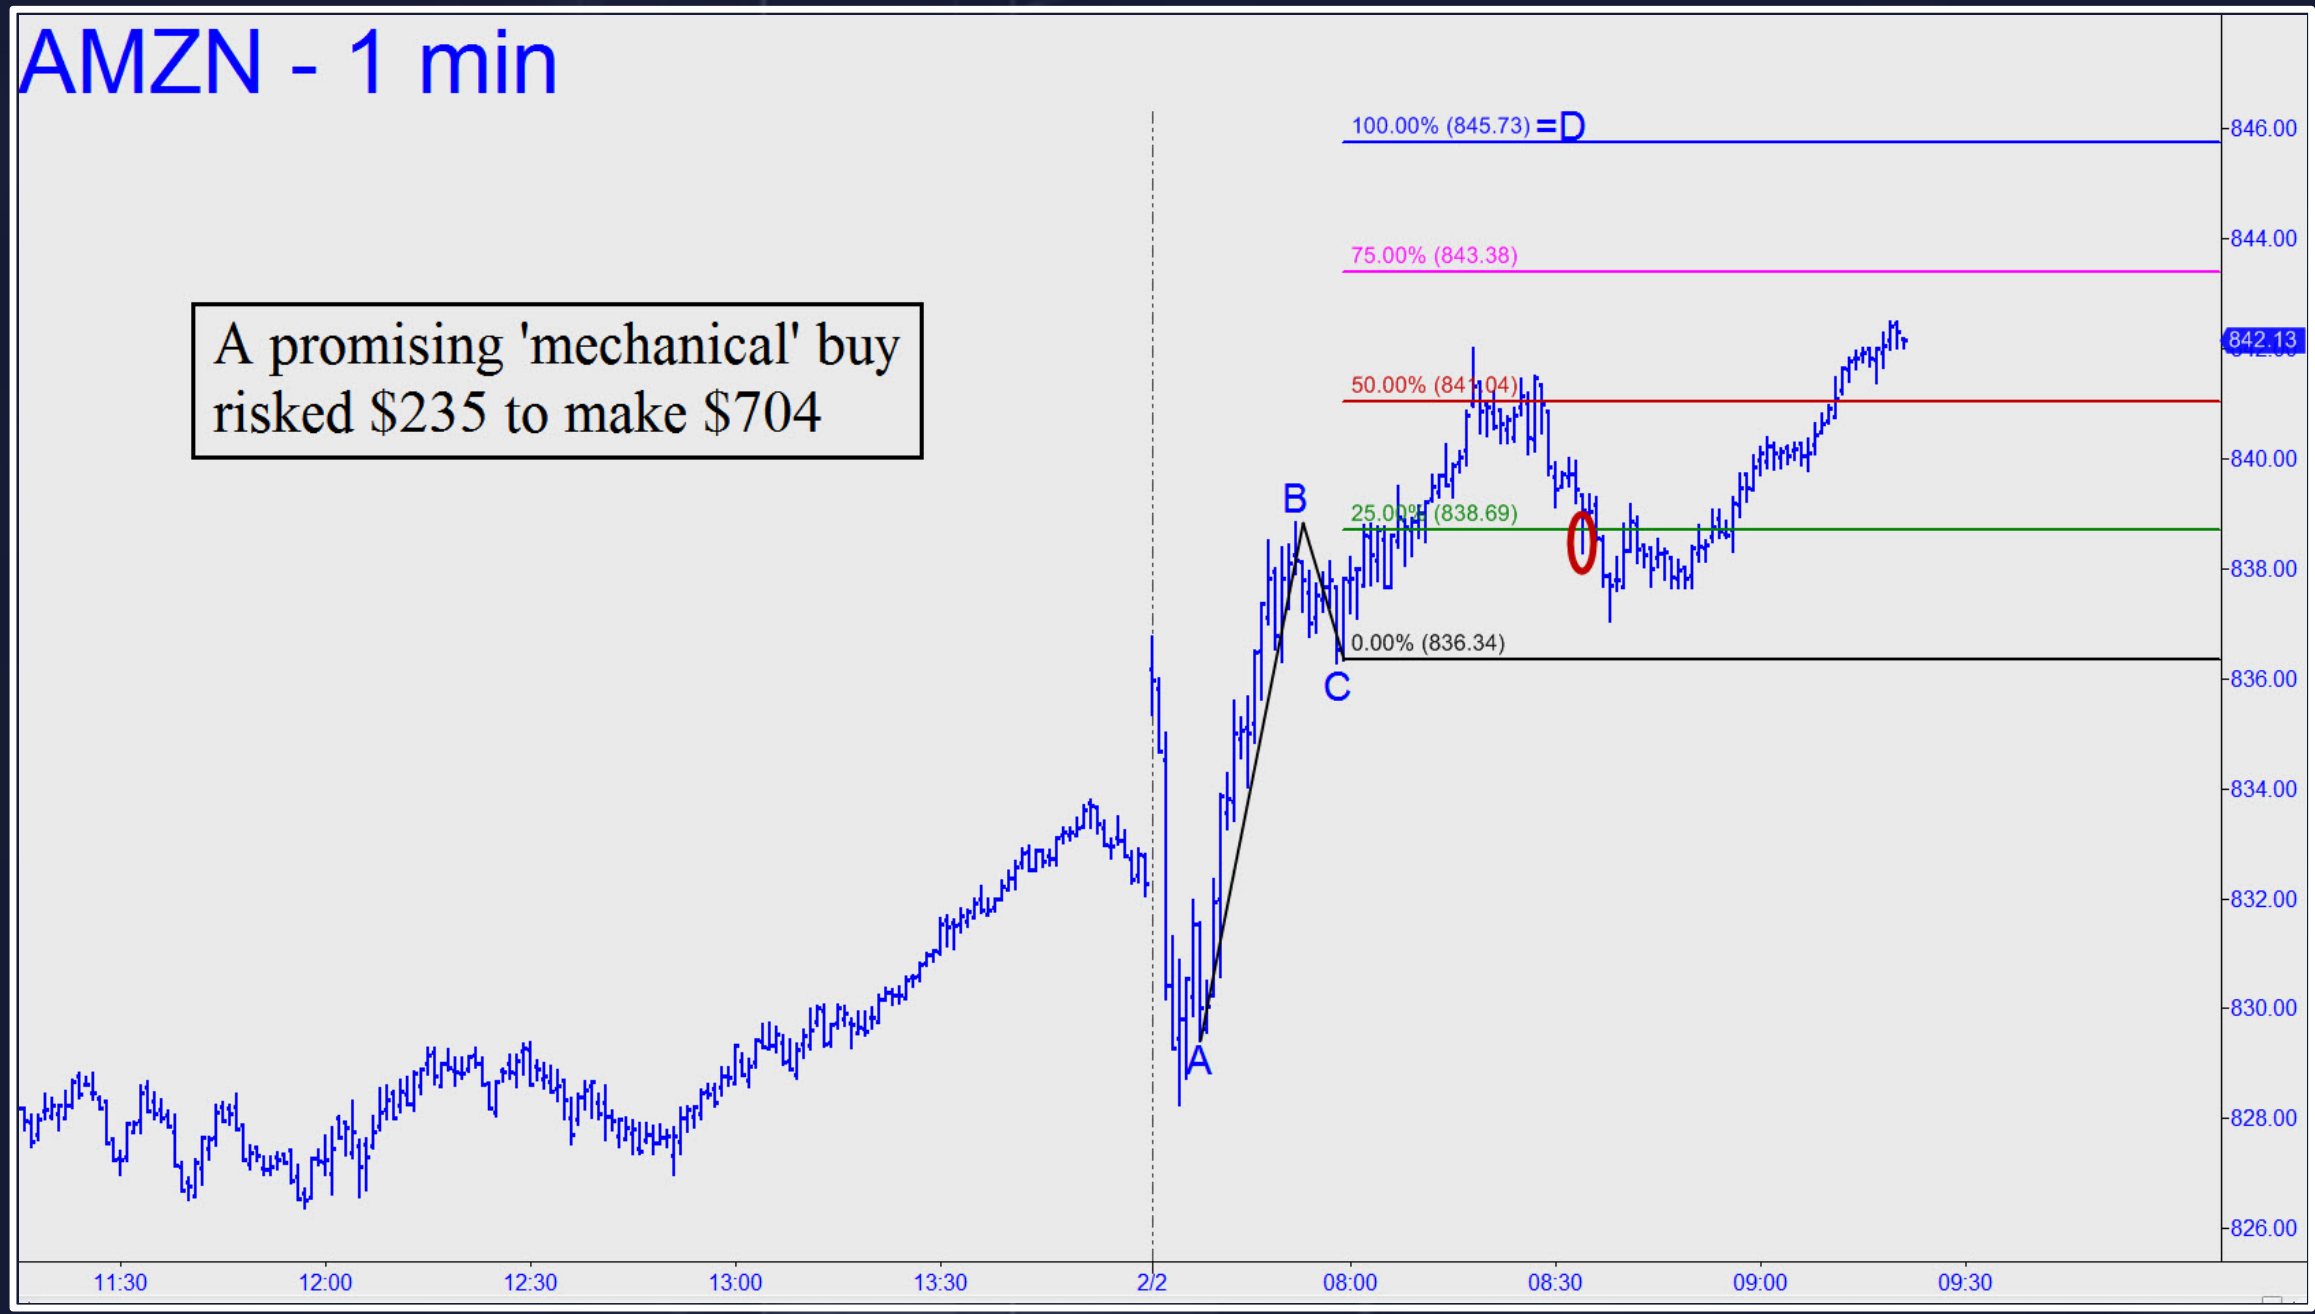

Bid at the red line and wait for a pullback

Secret #3

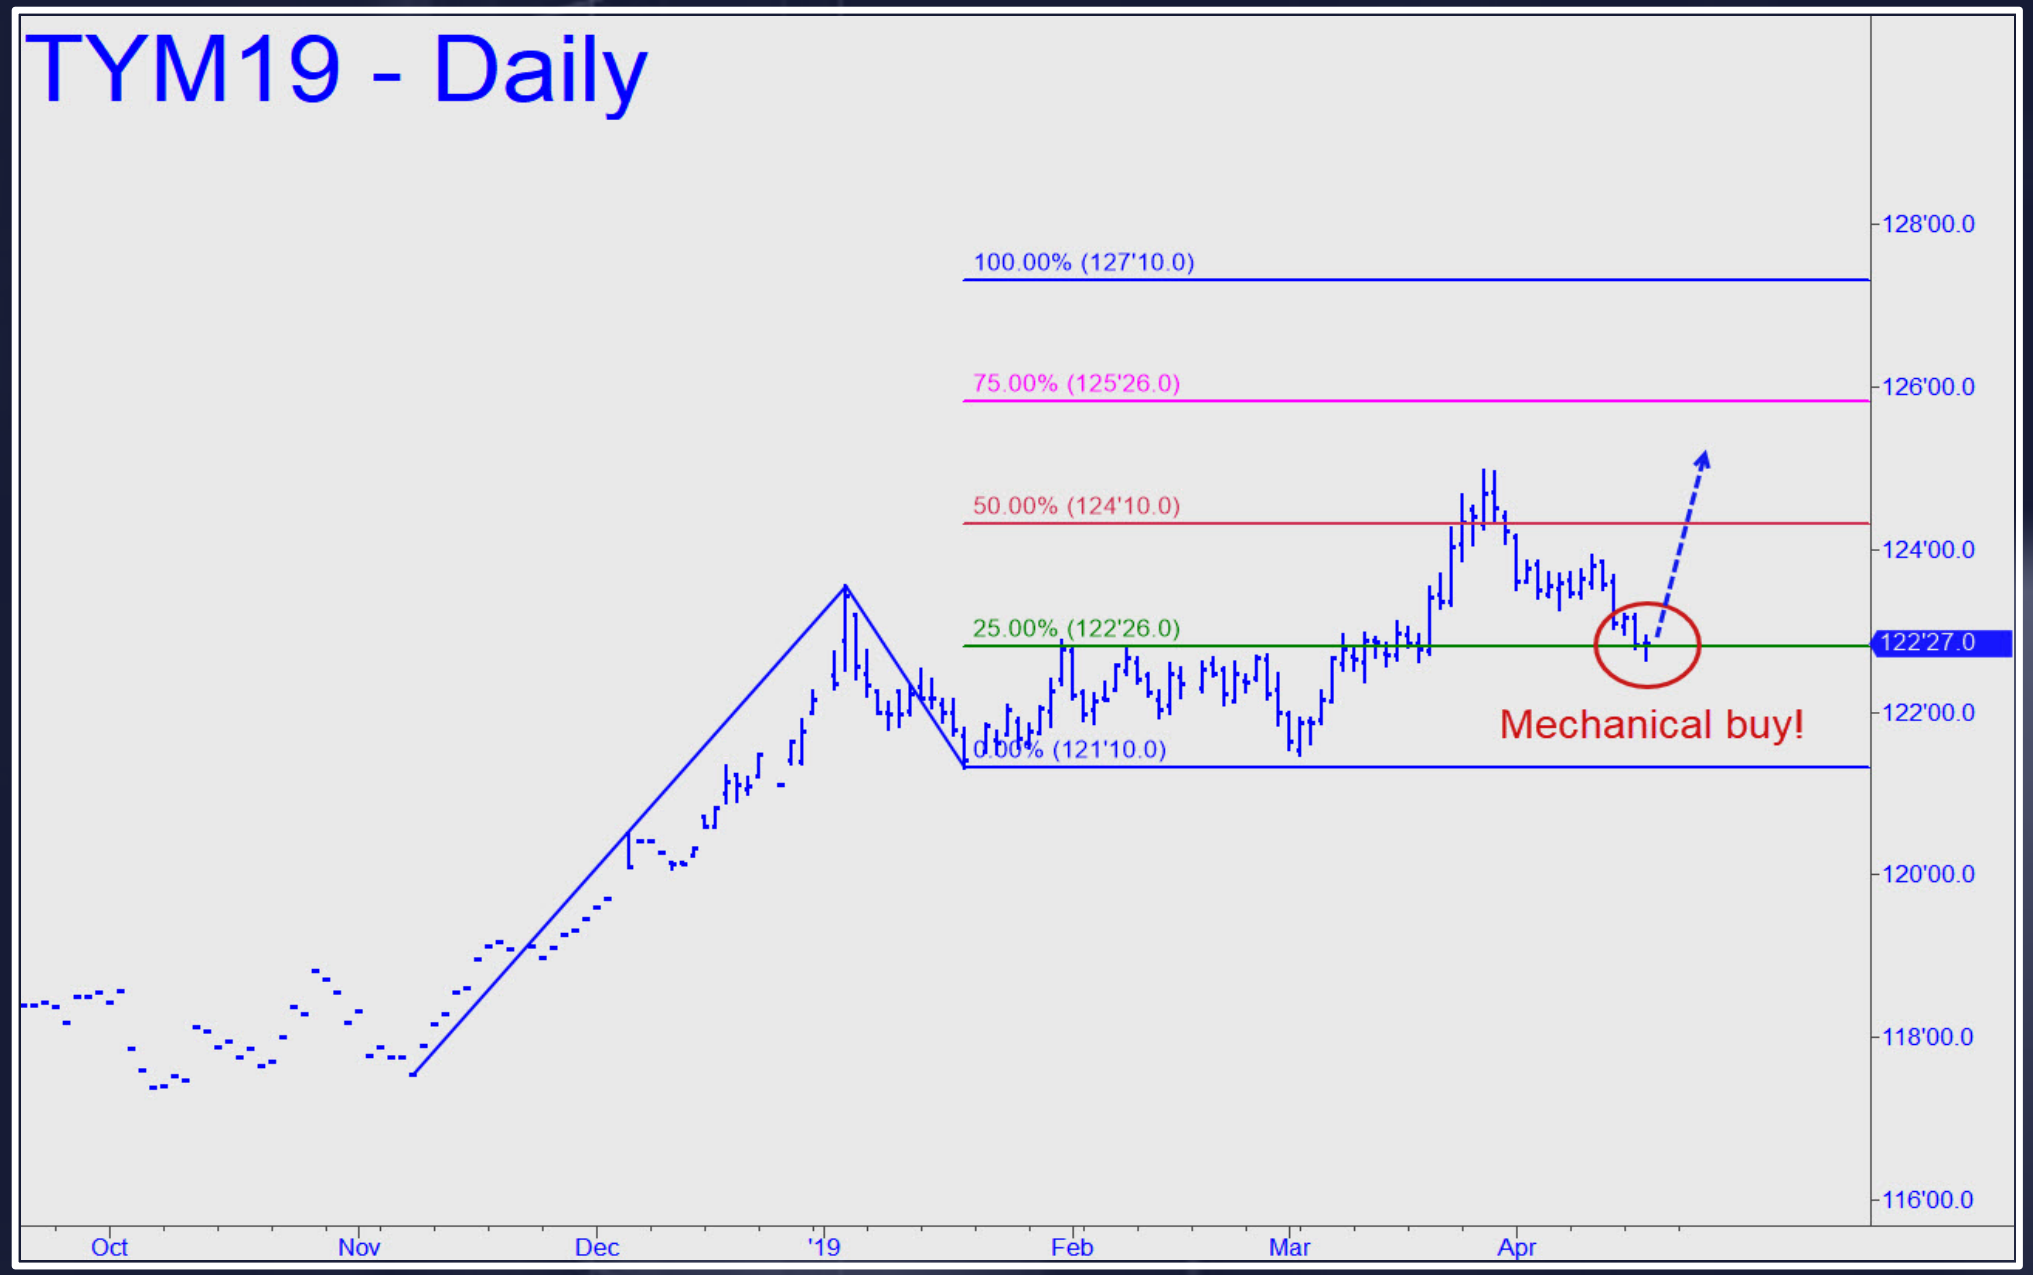

Avoid the single biggest mistake that makes disciplined trading impossible:

Don't be a trading-system dabbler!

It doesn't have to be complicated!

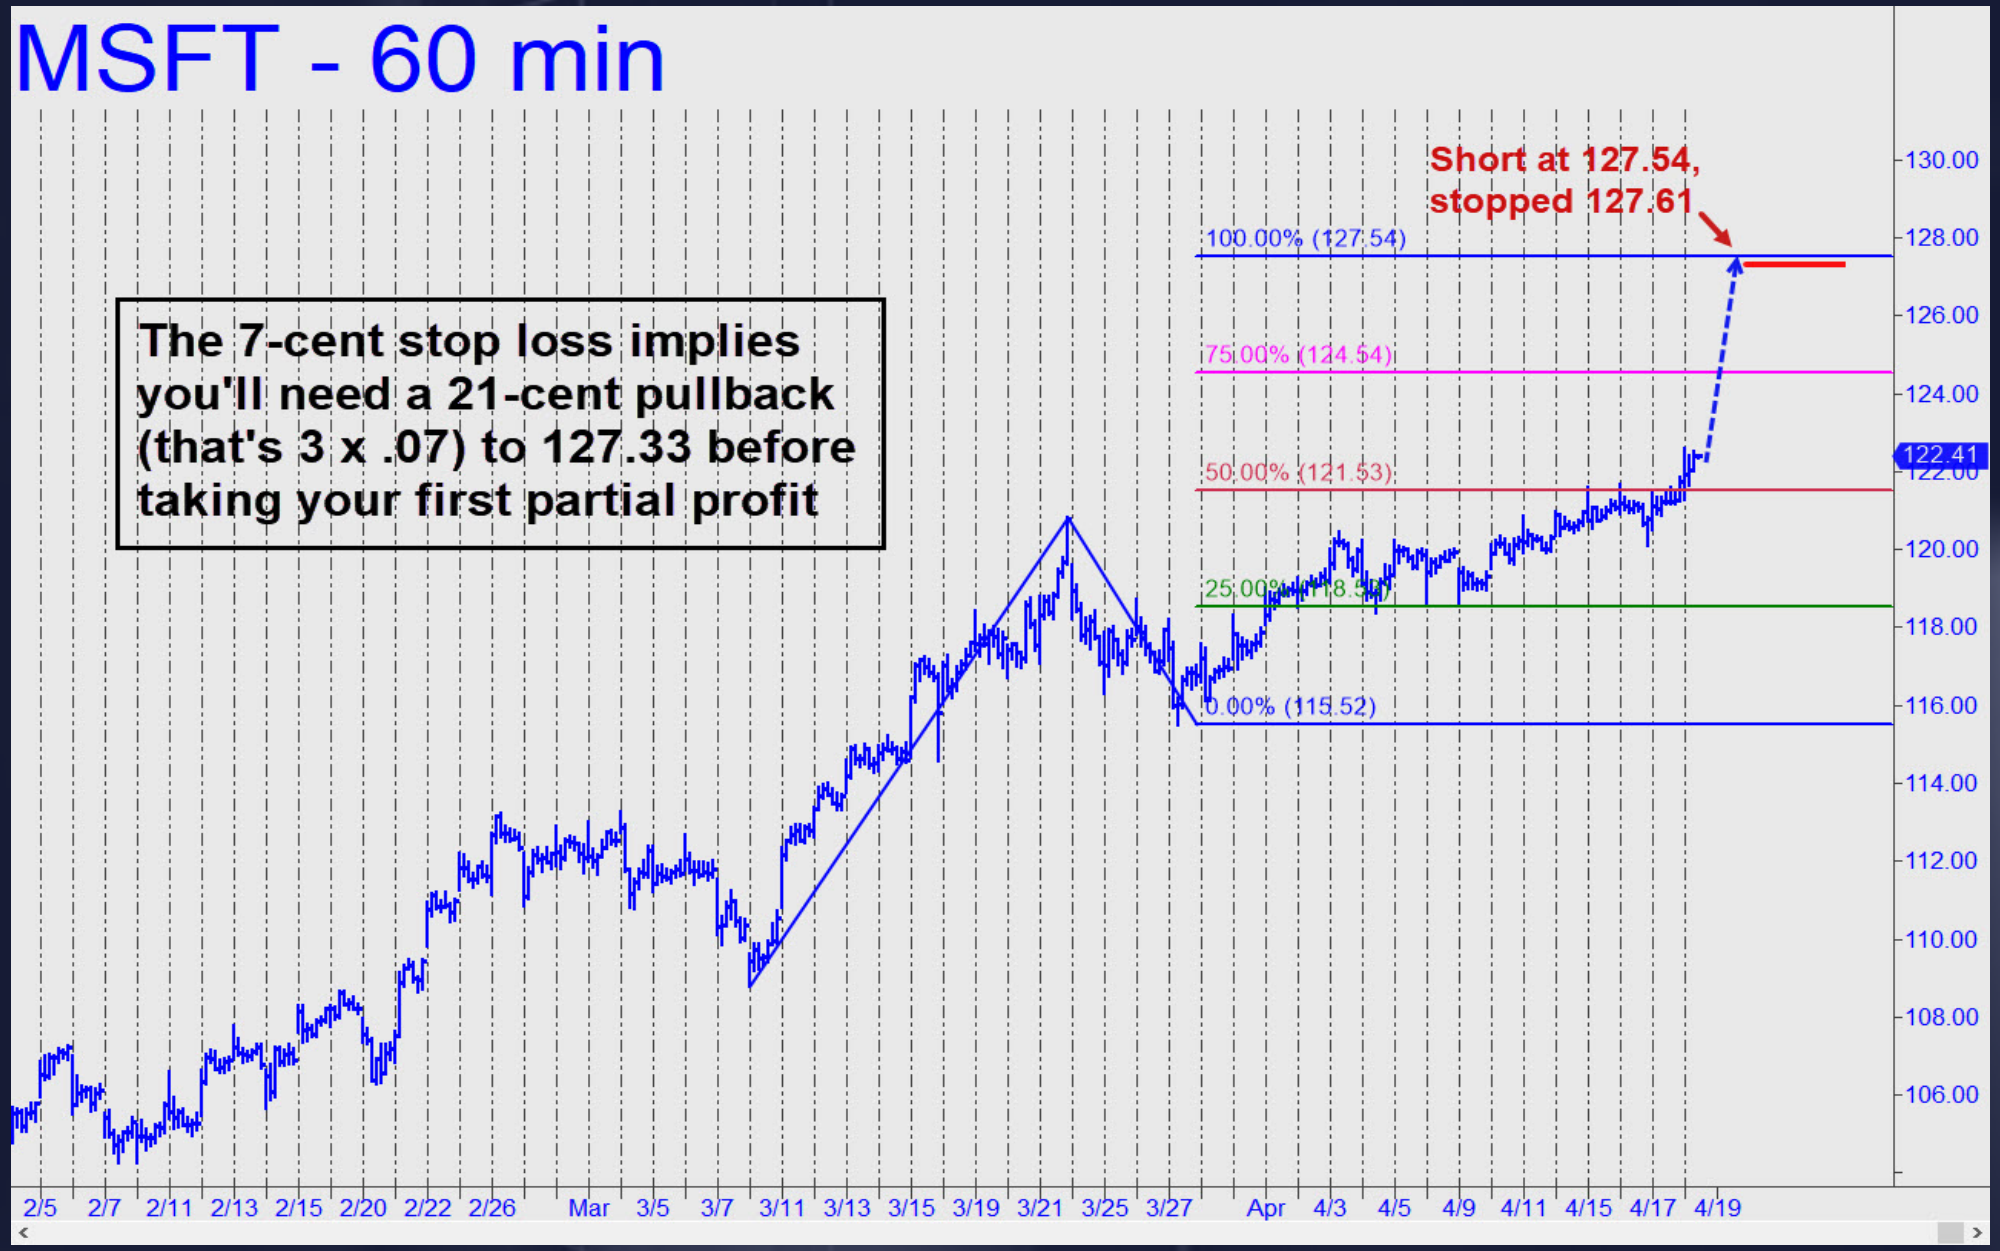

Price bars are all you need

Use Hidden Pivot levels to manage risk

Managing risk when outcome is unknown

Using ‘dynamic’ trailing stops

As easy as ABC, right?

I finally paid the tuition for Rick's course and regretted having waited. I strongly encourage you to take the course. It has been the best investment in trading education I have ever made.

Ed D.

I took the seminar last week and it paid for itself quickly. I was very upside-down, but I cleaned it up and am now on solid ground with my investments.

Rick, you have a subscriber for life. This is the best site I've run across. I took the gold trade by buying JNUG this morning, 3000 shares. Just sold them for a $5,000 profit that paid this month's mortgage on my house. Thanks!

I have only been trading 18 months or so and now make a living at it. Hidden Pivots are one of only a couple of methods I use.

Thanks, Rick, for this forum. Your chat room has immeasurably improved my trading.

You can see why others have paid as much as $42,000 a year for my forecasts

What is a winning trade worth to you?

✓ $200?

✓ $1000?

✓ $5000 or more?

I hope by now you can see why this package is such a great deal at $4492.

However, because you've given me an hour of your valuable time today...

I wanted to see if I could earn the cost of the webinar before it started. I exceeded this goal easily just by using midpoint pivots as targets. There was only one loss in 15 trades!

Alice Iwasa

I had two choices...

Rick, in over 30 years, as a pro in the business, I have never seen anyone taking such responsibility and interest in their clients.

Joe Charland

It sometimes seems almost supernatural the way your pivots work so accurately. And thanks for the clear advice on money management . It is making a better trader of me.

Mark C.

Suppose this package ...

Gave you the ability to spot the best trade set-ups before the crowd?

Gave you a precise entry and exit point for every trade, never risking more than $1 to make $3?

Took the stress out of pulling the trigger by giving you confidence in your own judgment?

Gave you the ability to spot trend reversals before nearly everyone else?

Would it be worth it?

The Hidden Pivot course is the best money I have ever spent.

I am a piano tuner. During a recent vacation, I fired off a winning E-mini gold trade you'd mentioned during an impromptu session. I've been using the techniques I learned during last month's webinar and have already paid for the course...and it looks like I'll be able to cover at least some of the costs of my vacation. Thanks!
